**BRITISH LAUNCH**  
**GREATEST WARSHIP**  
ANOTHER IS UNDER WAY  
Mount Nine 16-Inch Guns and  
Are Said to Be Latest  
Word in Naval Construction

The Nelson, the most powerful warship afloat, has just been launched in England. Her sister ship, the Rodney, is now building at Birkenhead. These two ships represent the only two battleships now under construction throughout the world. They typify the last word in naval efficiency, and at the same time they will be the last battleships constructed in any shipyard in the world until the period set apart among all the nations under the Washington convention for the cessation of battleship building says an International News dispatch. The Washington agreement imposed limitations. These new vessels will not exceed 35,000 tons in weight, and they will not be as big as the four British battleships under construction and subsequently scrapped under the Washington convention, but nevertheless they will be the most formidable fighting ships in existence. Superior to All Notwithstanding all limitations, the best brains in England have been busy on these ships, and it is safe to say that no vessel in the world will be capable of tackling them. Their fighting strength is such that they carry nine guns of the 16-inch calibre. These weapons are something like 79 feet in length and will fire projectiles of one and one-fourth tons weight. The original dreadnaughts of twenty years ago fired projectiles of just one-quarter of this weight — and at that they were thought to be miraculous—so the fighting strength of the present ships can be clearly recognized. The total broadside fire of the ships will be ten tons of metal which can be fired twice a minute. Twenty tons of metal a minute—that is the "Big Noise" that the Newcastle constructors are to put into the water. Their speed has not been disclosed, except that it exceeds any battleship taking the water before. In naval circles it is put at 27 knots. Have "Double Skin" In defense all the lessons of Jutland and other battles of the late war have been taken into account, and the

Nelson and the Rodney will outstrip anything else in their resistance to gun-fire and torpedo attack. Both have a "double-skin" which was added to the Renown, Repulse and Hood battle cruisers to resist torpedoes, and both contain many other novelties about which nothing will be said. Naval people call them the "Hush-Ilush" ships in construction; the "Dash-Dash" ships in defense and the "Smash-smash" ships in attack. The price of each will range between thirty-three and thirty-four million when completed.

### NEWSPAPER COSTS GREATLY INCREASE

Hence Southern Publishers Urge No Boost in Postal Rate on Publications  
Southern publishers, appearing before a Congressional subcommittee, at Atlanta, recently, declared that Congress not only should not increase postal rates on newspapers, but on the contrary should reduce the rates on second-class matter. The views of the southern newspapermen were presented by Colonel Robert Ewing, of New Orleans, and Major E. B. Stahlman of Nashville. Major Stahlman declared that newspaper costs have been rising steadily and the publishers generally do not get enough for their papers to pay postage and white paper costs. The cost of publication has virtually doubled since 1914 he stated. Colonel Ewing submitted a brief prepared for the Southern Newspaper Publishers association. It stated that newspapers are gradually ceasing to use the mails because of the present rates and that many publications are using freight service. It was conceded that the present rates are too high and should be reduced by Congress. The brief declared that the Rural Route Service which cost approximately \$87,500,000 in 1923, and the Star Route Service that cost \$12,500,000, "are services that are rendered for national growth and have no right to the Postoffice Department." The brief protested against any adjustment that would increase rates on second-class matter that were in effect in 1920, after the second advance of the War Revenue act. The kids don't always respond to high moral inspiration, but it has a certain regulative influence over them to realize that Christmas is coming. Now is the time for the amateur Sherlock Holmes to come around and let us know who is perpetrating the burglaries and hold-ups.

### CROP REPORTS ARE FAVORABLE IN 1925

Prosperity Returning to the Farmers Indicated by Surveys  
Prosperity is on the way for the farmer in 1925, according to the government crop report just issued. The basic crops of wheat and corn, figured on present price bases will yield the farmers close to four billions of dollars in 1925, according to the forecast. The wheat crop is placed at 679,000,000 bushels and the corn crop at 2,956,000,000 bushels. The 1,387,000,000 bushels of oats, at farm prices is estimated at \$416,000,000, the 214,000,000 bushels of barley at \$128,000,000, and the 52,000,000 bushels of rye at \$47,000,000. This would make the five grain crops at close to \$4,500,000. Total for the five grains—wheat, corn, rye, oats and barley—was 5,256,000,000 bushels, or 183,000,000 bushels more than was harvested last year, and 67,000,000 bushels less than suggested by the report August 1, last year. The winter wheat crop is 12,000,000 greater than was expected but is still behind that of last year. The estimate on the spring wheat crop is 263,000,000 bushels or twenty million bushels less than last year. The report on the corn crop is optimistic. The estimate is 22,000,000 bushels above the average crop and a gain of 519,000,000 bushels over last year. The oats crop, it is said, is turning out much better than was anticipated a month ago. FEDERAL AID ROADS BUILD DURING YEAR Nearly Ten Thousand Miles of These Highways in Various States Nearly ten thousand miles of federal aid highways were built and accepted by the government in the various states during the fiscal year just closed, the exact total being 9,445 miles, according to statistics just made public by the Department of Agriculture. The cost of these roads was \$190,485,399 and of this the federal government contributed \$87,801,946. In addition 4,587 miles were completed, but have not been accepted formally by the government at a cost of \$105,123,086, of which federal aid totaled \$47,606,101.

### VACATION COST IN U. S. IS HUGE SUM

Totals Over Three Billions, According to Report of Commission  
The vacation cost of the citizens of the United States for 1925 reaches the enormous figure of three billion dollars in cash. These figures, obtained from the best available records, give one an idea of how approximately thirty million persons took time off from their daily labors to play. The Interstate Commerce Commission received monthly reports from the railroads throughout the country and these reports indicated that passenger traffic during this summer was considerably above the average of previous years. These reports indicated that the transcontinental travel was particularly heavy and that reservations for berths in Pullman cars were hard to obtain unless spoken for some time in advance. The great national parks, California and Florida, were visited by larger throngs this year than ever before, while the summer resorts on both the Atlantic and Pacific coasts have enjoyed a more prosperous season than even the most optimistic hotel keeper expected. In addition to the summer resorts on the coasts and the mountain play places, the tourist camps for automobilists all over the nation were filled to overflowing. It is estimated that more people took long motor trips than ever before. The amount of money, three billion dollars mentioned, is derived from striking an average of two weeks' wages and salaries of the people who took their vacations. Wages and salaries of this amount would indicate that the hard times predicted by the political adversaries of the administration not only failed of fulfillment, but strongly emphasized the fact that the United States leads in general prosperity. Europe can boast of no such figure. DEAN BROOKS MAKES INTERESTING REPORT Dean Wendell S. Brooks of Northwestern university, and formerly instructor in English and Latin at Deerfield-Shields high school, in an interesting report published in the Daily Northwestern, quotes statistics to show that Phi Beta Kappa students in colleges usually have shown high marked scholastic records in their previous careers in high schools. The report is of interest that it emphasizes the necessity of colleges selecting the better students from secondary schools.
