COOLIDGES TAKING INTEREST IN YOUTH

President and Wife Aiding In **Every Way Organizations**

For Their Benefit It has long been known to the American people that the President and Mrs. Coolidge are intensely interested in the youth of the nation Upon many occasions both the President and his charming wife have quietly aided the boys and girls of this country. The other day Joe Nevin, who was chosen as Washington's typical boy, called on Mrs. Coolidge and explained to her just what the proposed model boy's club, which they are organizing at the present time in Washington, would be. Young Joe, whose father is one of Washington's leading newspaper men, evidently has inherited his father's power of de scription, for he outlined to his host ess how two or three thousand poor boys will have a club where they may indulge in swimming, romp ir tures, and participate in many other beneficial and healthful recreations to aid in every way possible and to assist the President, who is honorary President of the International Boys Club federation, in his efforts to help the boys and girls of the country.
