

seems to be starting, well, I'd like to write chapter two to this story in five years from now.

Formerly people used to travel a distance to dig for gold at the end of the rainbow, but now it is considered easier to incorporate the in a stock company, and sell the and bonds.

A BIG FIRE NEEDN'T MEAN ANY LOSS!
ASK COALE & SON

IT isn't the size of the blaze that governs the size of a fire loss—it is the amount of fire insurance you carry. Don't be a "fire-gambler"—you're taking too big a risk. Let us go over the insurance question with you. You fire your questions at us and we'll answer them.

IF NEW YORK HAD A BOOM
CANCER STILL GAINS
UNCLE SAM WHEAT SALESMAN
\$400 FOR ONE CHILD

Changes are slow or they are violently rapid. For thousands of years men were content to travel on animals, or slowly moving clumsy vehicles.

And in less than one century came the change to the steam railroad, the automobile, the flying machine, the submarine, and from the messenger on foot to wireless.

What will the race do in the next 1,000,000 years?

For real deals in real estate observe New York City. Millions upon millions are poured out; no one notices it.

One man, F. F. French, announces a building project to supply living quarters for 800,000 people. They will be housed in a building towering toward the sky and covering a small plot on Manhattan Island. In one corner of Greater New York there will be a new little group of 800,000 people, in itself, "one of the great cities of America."

What will happen if New York ever has a real estate boom?

Cancer, steadily increasing for 75 years, is still on the increase. The highest cancer death rate in the United States is found in Massachusetts and doctors do not know why. South Carolina has the lowest cancer death rate. Investigation of diet, number of unmarried women, and other social statistics might enlighten the profession.

All records are broken in freight traffic. In October railroads carried more than forty-four billions of tons about a billion tons more than October, 1924.

The growth of California's fruit business is reflected in orders for more than 5,000 new refrigerator cars for the Union Pacific and Southern Pacific.

Before long, unless a prominent automobile manufacturer fails in his undertaking, flying machines will do a great deal of this refrigerator business, swiftly and much more cheaply, making "cold" cars unnecessary.

The fruit will be taken on board and carried to a height to supply natural refrigeration, the plane going up or down in accordance with the thermometer, and arriving at its destination with the fruit naturally refrigerated to just the right point for storage.

Young men now making a living with independent passenger buses will make a better living with independent refrigerator flying cars.

Senator Capper, of Kansas, one of the ablest friends the American farmers have in Washington, says Uncle Sam might well co-operate with farmers by actually helping them to sell their grain. High spirited financiers say this is close to anarchy, but this doesn't worry Capper.

The government helps railroads by raising rates and compelling the public to pay. If Uncle Sam can act as ticket salesman and price booster for the railroads, why not as wheat salesman for the farmers?

Two million five hundred thousand American income tax payers will welcome one change in the proposed income tax law. It increased the exemption of single persons to \$1,500 and of married people to \$3,500.

Why not increase the exemptions for each child? You can't bring-up a child for \$400 a year. Parents raising children are working for the state without charge and ought not to be taxed for their trouble.

NAME MANAGER MUSIC FESTIVAL ASSN. LATER

No official announcement of Carl D. Kinsey's successor as manager of the Chicago North Shore Music Festival association will be made until after Walter B. Smith, the secretary of the association, who is away from Evanston, returns to the city and a committee meeting is held, according to C. W. Spofford, president of the association.

Mr. Spofford, however, admitted that Mr. Kinsey's successor has already been unofficially selected and that he was carrying on the festival work. He refused to state his identity.

Mr. Kinsey resigned, after serving as manager of the festival for seventeen years, when a sharp difference of opinion developed between himself and the members of the board of directors as to whether or not a student artists' might be included on the festival program.

Mr. Kinsey believed that such an inclusion would lower the standard of the festival while the directors believed it would be a splendid way of encouraging the younger American artists.

The folks who have been lying down on their job all through 1925, are reporting that it has been a very punk year.

Some of our young sports can't see why the old man can't put up the money for their fun, as the must surely be able to borrow.

Anyway the modern kid shows his energy by the speed with which he proceeds to smash up his Christmas toys.

Model 86—Two-dial 5-Tube Receiving Set, detachable from console stand, permitting use on floor or table. Overtones Speaker built in. Price \$135.00 (less tubes and batteries).

THE outstanding merit of the Pfanzstiehl is its simplicity. No radio frequency circuit has ever been designed so free from adjustment and complications. There is nothing to adjust; nothing to neutralize. That is the secret of its tone beauty. It is the secret of its trouble-proof operation. The set is so simple it cannot get out of order unless abused—a very desirable feature in the hands of inexperienced users, who want enjoyable, trouble-free service.

Be sure you hear a

before you purchase. There is nothing like it for real enjoyment in the home. Come in and see the various Pfanzstiehl models ranging in price from

\$85 to \$450

The Gift that Keeps Christmas

FOR the woman who receives a Maytag Gyrafoam Washer on Christmas there begins a new kind of washday—more real, practical helpfulness than she has ever known before.

Washing, that task which formerly required long trying hours, is magically reduced, by the wonderful principle of the Gyrafoam, to a matter of minutes. A tubful of clothes clean in 3 to 7 minutes. In 60 minutes an ordinary family wash completely, immaculately finished.

It's quick! It's thorough—handrubbing even on wristbands, cuffs or collars, is unnecessary! And since it washes entirely by water action, it is every bit as careful with dainty garments as hand washing.

Take the happiness your wife or mother knows at Christmas and prolong it for her washdays—for all the years to come. Give her a Maytag—she wants that kind of a gift, that kind of help.

9 Outstanding Maytag Features

- 1 Washes faster.
- 2 Washes cleaner.
- 3 Largest hourly capacity in the world.
- 4 Most compact washer made—takes floor space only 25 inches square.
- 5 Cast aluminum tub—can't warp, rot, swell, split or corrode.
- 6 Easily adjusted to your height.
- 7 Clothes can be put in or taken out with the washer running.
- 8 Tub cleans itself.
- 9 All metal wringer. Self adjusting. Instant tension release.
