To Migrate or to Hibernate

is not so much a matter of dollars and

Reckoning winter's heavy overhead and the

dangers to health that follow in its wake,

the net cost of a winter's migration to

California, whereaccommodations are ample

and reasonable, is hardly a dollar more.

Make this winter your California summer

choosing as your train the luxurious

OCCUPATIONS ARE California COMPARED AT Y. W.

HOUSE & FACTORY WORK

Group of Young Women Who Are Engaged In Latter Discuss Domestic Duties; Do Not Favor Them

"Housework vs. factory work was illuminated recently by first hand impressions from a small Y. W. C. A. group of young women whose occupations are in the factory class. Disadvantages of doing work in other people's kitchens they agreed are lack of definite hours, the necessity of asking for every little favor, too great dependence on the whims of the mistress of the household and too much Sunday work due to 'Sunday

Advantages that they cited as compared to their own jobs on factory hours are the ability to plan ones own work, an artistic home, good food, variety in ones work, sitting or standing and the association with people of education. Indifference on the part of the employer as to social life for her domestic worker is another.

Clocks With Whistles Kitchen clocks that had a closing whistle would do a lot to popularize domestic service, the girls agreed. At present it is very difficult to have girls from household employment regularly in attendance in Y. W. C. A. activities. Such girls can rarely keep their own evening engagements, they

"At a party that we arranged to attract these girls, nine of the fifteen girls that we had worked hard to get, had to send word at the last minute that they couldn't come," said one hospitable member of a Y. W. C. A. industrial club. "Their mistresses had suddenly decided to go out for the evening. That meant that the girls had to break their own engagements and forfeit the time promised to them to stay home with the children,"

Most girls in other people's kitchens are very sensitive about their work, was the comment of another girl, who is an overall maker. "We don't feel it, but they do," said another girl who works as a looper in hosiery mill.

Enroll for Course Upon the urgent invitation of girl members from other types of employment in Y. W. C. A. industrial clubs, domestic workers are slowly beginning to join. At the workers summer school at the University of Wisconsin, several girls from domestic service in private homes enrolled for the six weeks' course and made a creditable showing.

PUBLIC DEMANDING ONE-DOLLAR BILLS

Fewer of Large Denomination Asked For, and Two-Dollar Type Not Favored

Of late the United States treasury has observed a new tendency in the use of paper money. The public is constantly calling for more small denomination bills and less big ones. The run is on one-dollar bills. Where the public used one one-dollar bill in 1900 it is now using seven. Where it carried one one-dollar bill in its pocket in 1910 it is now carrying three. Carefully worked out figures show that, in 1914, one-dollar bills made up 40 per cent of the bulk of the paper money outstanding. Today they make up 50 per cent of that bulk.

Some believe that the automobile is to blame for the increased use of dollar bills, says the Nation's Business. Five gallons of gasoline is dollar bill and a few cents. Ten gal-Ions is two ones and some silver. This an ever-recurring purchase throughout the nation. It may have much to do with the boom in ones. It seems, upon examination, however, that a new-formed habit has become general throughout the country. The public seems now to be carrying a wad of one-dollar bills in its pocket. Where the average man used to carry a ten and a five in his wallet, carefully buttoned into an inner pocket, he now carries twenty-ones, stuffed

in his trouser pocket. The treasury holds that the excessive use of one-dollar bills inflicts an unnecessary hardship on the business community and the Treasury Depart-

The American public has definitely given up the use of metal money other than as small change. It is to be expected that the one-dollar bill should be much used as the next step above quarters and halves. Then there is a logical point where efficient use of currency requires that the ones should give way to twos, fives and tens. The public seems to be disregarding this point.

The prejudice of the public against using two-dollar bills is amusing but probably prejudicial to currency efficiency. There is a superstition that the two-dollar bill is unlucky.

Many of the flappers want to know how they can make themselves more popular among the boys. One way would be not to chase after them so relentlessly.

will be able to spend any money that Last to join the ranks is the state of the take over and operate them by word pictures, many would consider a taxpayers.
