The Better BUICK

Starts easily

Buick motor cars are designed to run efficiently in every temperature, and under every climatic condition. Only a small percentage of the million and more Buicks have the opportunity to go to California or Florida for the winter.

Buicks start quickly, even at zero. The new, high-speed starting motor accomplishes this most desirable result.

Runs smoothly

Buick Automatic Heat Control reduces another coldweather starting annoyance -that of bucking, spitting, misfiring engines. This exclu-sive Buick feature heats the fuel supply, and saves gasoline, automatically and immediately.

Stops safely

In rain, snow or sleet Buick mechanical 4-wheel brakes stop the car firmly, in a straight line. Neither heat nor cold affects the direct mechanical action of these brakes. There is no liquid in them to expand, contract or leak away.

Buick is a better Motor Car-In Every Kind of Weather:
