WANTS WORLD WAR FACTS ASCERTAINED

of Probe by Committee Which Is to Report In February; Many Difficulties

ready growing musty, and seeking to dren are imbaed with lasting ideas

Preparing Report The carrying out of the Owen resolution was placed in charge of legislative reference service of the library ty as compiled by the accident preof congress. The committee is re- vention department of the Chicago quired to report by February 1, 1926, Motor club points out the causes for several hundred pages.

monumental task say that it is almost able wherever the automobile is drivimpossible to uncover the real causes en and accidents occurr. During 1924 of the World War from the mass of two bundred and one children under evidence which is available and it will the sge of sixteen were killed by HIGH GRADE GRAND PIANOS probably be a long time before the automobiles in Cook county. One huncontroversy is finally settled. The ired and twenty-five were killed in committee is handicapped from lack the middle of the block, eight were of funds and is therefore compelled killed in alleys, and sixty-eight were to carry on its research among the 'tilled at street intersections. One documents available in the library of hundred and ninety were killed on congress. The difficulty is further ity streets, two in parks, three on abetted by the fact that only two of country roads, and six on boulevards. open their official war archives to the

Many Difficulties These two are Germany and Russia the existing government. The archives of Great Britain and France, it is he day. Thirty-eight children of the said, are still closed, and until these are opened it is clear that any broad he number dropped to nineteen and fair weighing of all evidence on the causes of the war will be impos-

However, the committee will submit the very best report possible to the Senate foreign relations committee and it can then be said that at least a start can be made in sifting the grain from the chaff.

The school child learns easily real causes which started the world and quickly and what he learns in his youth will as a rule remain with him

through life. How Compiled "The accident record of Cook coun-

and there are indications that it will accident to children and makes the have ready by that time a report of remedy obvious. These figures are of interest not only to the citizens of Those who are working on this Cook county, they are equally valuthe European countries have thrown the months of the year when children play outdoor games were found to be the most dangerous, and the hours ifter school is dismissed took the createst toll of lives, from four to which there was an overthrow of ix in the afternoon was found to be y far the most dangerous period of ige of six were killed, but at seven

Point the Way "These figures correctly interpre-

ed, point the way to a reduction of ccidents, and this lesson holds good everywhere in the country. The superficial safety worker, the one who nakes the business of saving lives in avocation rather than a vocation, will see the solution immediately. Regulate the speed of the automobile and you will arrive at the solution. ne will say. Others will go further and demand governors limiting, the speed of all motor vehicles, while from still other quarters we shall hear demands for the examination of all drivers, on the theory that some sort of mental and physical examination will eliminate all careless drivers. Inventors of special systems of regulating traffie, systems of light-Through all the ages of civilization, ing and signalling, put forth claims and even through those dim centuries that in their devices will be found when men lived in caves or rude huts, the key to the entire situation. In all there has never been a time when justice to this latter class, it must mankind has not brought life and in- be said that many of the systems terest into the walls of his home by advocated have much to recommend them, and that mechanical devices of In the prehistoric cayes of Europe various sorts, such as automatic sigthere are still faint traces of the pic- sai lights, have done much toward tures which their dwellers scratched heiping solve the problem. The hys-

and sketched upon their rough sur- "The weight of the body is taken faces. There are still the friezes of upon the outer border of the heel and the Greek temples, the colored sketch- as the weight gradually passes fores on the ruined walls of Pompeii, the ward it is taken along the outer, or magnificent tapestries with which the the more or less solid portion of the lords of the Middle Ages made their foot," he explains. "As the weight foot, the body's weight should be In our own America, there are the forced forward with the five toes, to be avoided, for it destroys grace of And in Italy of the Renaissance—at movement and the same effect can be that glorious epoch in which men's obtained by placing the foot forward minds reached the flowering point of in a straight line. Do not be afraid all that is splendid and beautiful-the of wearing the shoes on the outsidefrescoes and wall paintings with shoes can be repaired much more easwhich they enhanced their homes and ily than feet, and with much less pain.

Some Exercises "The following exercises will do great deal in building up the arches: "Pictures in our homes are just as | "1. While sitting, attempt to draw important now as they were in the the toes back under the feet toward day of Catherine de Medici. Today, the heels. Much effort should be used

frames which enhance not only their "2. While standing, do the same

"3. While standing, do the same relieve its monotony and afford an exercise and then, with toes drawn terest, but the color, line and size of soles of the feet begin to ache. This walking exercise should be carried on for five to ten minutes.

"These three exercises will do a great deal in shortening the muscles holding up the arch and also the muscles on the bottom of the feet. However, in the wa yof repetition, the exercise will do little good, if the individual continues to carry the weight of the body improperly upon the feet. Form the proper habit of walking and insure yourself the pleasure of good arches and joy in your daily walk-

Illinois is the greatest state in the Union in the production of flowers commercially, and number many "Burbanks" among its florists. The blue carnation is a comparatively recent product of their art.

A Type of Performance Never Before Obtained In Any Low Priced Car

Thousands have already driven the Improved Chevrolet.

They know its new smoothness, new stamina, new swiftness

They know that in performance it completely dwarfs every Chevrolet achievement of the past and that it ranks as the finest Chevrolet in Chevrolet history.

And if you are one who has not yet been behind the wheel, you have more than a treat in store. You have yet to experience a type of performance never before offered in any low priced car.

A performance so effortless, so smooth, so powerful, so spirited and thrilling in every phase, that you will call it nothing short of a revelation!

Chevrolet's leadership has been based on giving quality at low cost.

Now the Improved Chevrolet gives another reason for an even wider margin of leadership-performance the equal of which has heretofore been unattainable in the low-price field.

True, the Improved Chevrolet is easier-riding. True, there is striking beauty in the New Duco finishes. True, Chevrolet prices are lower. But the one great and outstanding reason why you and every other motorist should drive this splendid car, is to experience the matchless performance it now introduces.

Drive where you will—and as long as you like, through traffic, through sand, through mud, over hills - and over mountains, if you please. Expect something really new, really worthwhile, something really unique—and you will not be disappointed.
