PRESS WANT ADS BRING RESULTS

This Week

by Arthur Brisbane

Chicago votes on the proposition to make prize fighting legal. That is the plain English of it. The intelligence and character of Chicago will be reflected in the vote.

Prize fighting is brutality, gathers together criminals and spreads the worst diseases.

Prize fighting makes heroes of thugs and lawbreakers, setting a false example before growing boys.

It has been said that prize fighting trains men "to be courageous and defend their country". Well known American prize fighters, apparently, were all hiding under the bed when the war broke out, or they gave lessons to soldiers in camp, far from the shooting. You cannot mention a prize-fight champion that volunteered to fight for his country.

Prize fighting means violating the law against assault and battery for the sake of profit. A city voting for it would disgrace itself.

This is written after seeing New Orleans, with Colonel Ewing, boss of the New Orleans States, as lecturer and guide.

The old French Cathedral is beautiful and the Cabildo, in which was signed the Louisiana Purchase, is a museum of American treasures and memories, not equalled elsewhere.

We bought Louisiana, by the way, a territory that reached north, from the Gulf to the Great Lakes, for three cents an acre, the world's record in real estate bargains. "The First Consul of France", as Napoleon was then called, must offer wonder, in heaven, why he did not hold on to that parcel.

The people bought five billion dollars' worth of goods on the installment plan in 1925, and some say, "We are rushing into bankruptcy." But don't worry. Money well spent by those that can pay helps spender and seller and hurts nobody.

If you want a piano, radio set, automobile and know you can pay for it, get it NOW and enjoy it while you pay.

The rich buy real estate and stock or installments. A good automobile is worth more than a house.

The important thing is that installment business should be on a sound basis, not encouraging extravagance, charging excessive rates for time payments, or encouraging a man with a car, good for two or three years more, to get rid of it prematurely and glut the used car market. What hurts is waste, not spending.

Chicago will build streets hollow at the centre, higher at the curb, concave, instead of convex. Moisture will run to the center of the street, a more sanitary, less expensive plan.

Men learn slowly. Needles were used for 100,000 years before anybody thought of putting the eye in the point of the needle, thus making the sewing machine possible.

Mrs. Drake, vice-president of the Child Study Association, says parental instinct is disappearing. There are no more "natural born parents". There are still, fortunately, plenty of natural born MOTHERS, millions of them.

It is not affection, but knowledge, that mothers lack.

Five million radio sets in the United States have 27,000,000 human beings listening in. Sad that so little broadcasting is worth attention. Science perfects the machinery, but intelligence hasn't yet supplied worthy material. But that will come. In future ages, the individual worth while will have as personal following an audience of 100,000,000 or 500,000,000. The written word will no longer compete.

Ten million dollars' worth of oil burned in California, two men killed. Lightning caused two storage lakes to explode. Those that spend money on lightning rods will wonder how valuable they really are. Cannot scientists find a way, with high tension wires or otherwise, to protect oil wells and oil storage? How long before great conductors escort the lightning safely down from the clouds and use it as it comes down? Edison should work at that.

HIGH SCHOOL BAND TAKES SECOND PLACE

Takes High Place in Contest at Northwestern University Saturday.

Defeating the New Trier band which held third place in the state contest last year, the Deerfield-Shields high school band won the second prize trophy in the second annual band contest last Saturday morning sponsored by the Northwestern university circus at Evanston. Harrison high school won first place.

After the contest, all the bands assembled and several popular marches and gallops were played in mass band style.

In the afternoon all the bands marched in a mammoth circus parade in which over 700 students from the Northwestern fraternities and sororities took part.

Either Twin Can Drive This Buick

One of these young ladies is driving an automobile for the first time in her life.

She is Daisy Hilton, one of the famous Texas Twins. She and her sister Violet have been joined together since birth at the base of the spine. Because Daisy is the right hand twin, she has always had to sit in the passenger's seat while Violet piloted the car.

But in a recent visit to California the Howard Automobile Company, Buick distributors, solved the problem. The Buick used by the Twins has double control, and is used to teach new drivers how to handle a car. Violet is seen giving Daisy her first lesson in driving at the wheels of the double control Buick. These charming young girls are high school graduates, talented musicians and accomplished entertainers.
