

IMMIGRATION LAW IS NOT HARSHIP IS RESTRICTING ENTRY But Its Operation Is Not To Be Considered As Cause of Grief to Aliens; Proper Action

An interesting and convincing explanation and defense of the present immigration law is given in the current issue of the National Republic by Robe Carl White, assistant Secretary of Labor, who declares that it is clear that the new law is actually restricting immigration without causing undue hardships. The smuggling of immigrants into the country is being reduced, he adds, and will be reduced further as time goes on.

Millions Foreign Born

"How many Americans," Mr. White asks, "know that approximately thirty-seven millions of our population are foreign-born or of mixed parentage? How many Americans know that in the hundred years between 1820—

when immigration records were first kept—down to 1920, aliens to the total of approximately thirty-four millions came to this country? And that more than half this number—nineteen millions—have arrived here since 1890?"

"How many Americans know that before 1819 we had no immigration policy, and that immigration was totally unregulated? From 1908 to 1924, more than thirteen million aliens were admitted to this country and about half as many departed, leaving a net increase of 6,469,000 in our alien population. How many Americans know that?"

Given Little Thought

"Prior to the close of the World war our people gave but little thought or consideration to the question of immigration to the United States. Annual reports of the Commissioner General of Immigration and other official documents furnished the main supply of immigration knowledge. They were seldom quoted and seldom discussed. The old theory that this was an asylum for the oppressed of all lands, a country of refuge for all aliens, regardless of their past, regardless of their reasons for leaving their homes, was generally accepted. "The conditions, economic and so-

cial, confronting our country following the World war caused the spotlight of publicity to be turned on our immigration problems, with the result that our people demanded we take stock, ascertain facts that would enable us to determine the proper future immigration policy to be followed."

Jeremiah Shea, popularly known civil war veteran and old resident of Waukegan and vicinity will succeed the late Perry L. Harris as commander of the Waukegan Post of the Grand Army of the Republic.

THREE STRAINERS, GASOLINE SYSTEM Their Use and Operation Is Explained By Expert Mechanic

In the gasoline system of the car there are usually three strainers; one at the gasoline supply tank, one at the entrance to the vacuum tank and another at the entrance to the carburetor. Each of these should, according to the mechanical first aid department of the Chicago Motor club, have an occasional inspection. They may become badly clogged and re-

strict the amount of fuel which feeds to the carburetor.

The openings of the carburetor jets are, often very small holes, carefully gauged by the manufacturer to provide the proper fuel mixture. If a jet becomes clogged by a particle of dirt, engine operation will be erratic. Jets are usually removable, being screwed into the bottom of the carburetor, and are therefore easy to remove for inspection or cleaning. A metal wire should never be used to clean the openings of a carburetor jet; the jet opening may be enlarged and this will disturb the action of the carburetor. A broom straw is usually stiff enough to clean the jet opening and will not damage the finely gauged hole.

The carburetor as well as the vacuum tank is usually provided with a drain cock at the bottom. This allows any water to be drained off from time to time. The water, being heavier than the fuel, is always found at the lowest points. Water in the carburetor may cause spitting and missing, particularly at high speeds.

DO YOU LIKE TO EAT IN THE OPEN AIR?
DO YOU LIKE ITALIAN COOKING?
THEN COME AND EAT AT
CHEATEAU MARCHI
TEL. H. P. 1054 394 RAVINE DRIVE
LUNCHES SERVED 12:00-2:30; DINNERS 5:00-7:30
We MUST BE NOTIFIED IN ADVANCE for special dinners and suppers. Specialty—theatre parties either before or after Opera.
Madame Marchi needs no introduction as she is very well known along the North Shore for her wonderful cooking. Every thing is cooked in Florentine style, Madame being a native of Florence, Italy.
Telephone in for your party and dinner dates in advance so we can give you the best of attention and service.
We also cater our special dishes in Highland Park

Fenestra Casements

Completely Assembled—and Painted

On the Job With Your Other Materials

Fenestra Casement Windows reach the building site ready to install. No time is lost by carpenter or mason. As soon as the window opening is finished, Fenestra goes in—a complete window.

These better steel windows *always* work easily, are weather-tight, practical, beautiful. Cost no more than ordinary windows. Come in and see them.
