

PREACHER HAS BUS BRING CONGREGATION

Believing that the application of modern principles of transportation will increase the attendance at his institution, an East St. Louis preacher has inaugurated a regular Sunday morning bus route to round up the distant members of his congregation and Sunday school.

Although the idea is not original with the local minister, the six-weeks' trial being given the plan is thought to be the first in Illinois.

A coach has been chartered from the East St. Louis and Suburban railway for the trial period and if the experiment proves to be the anticipated success, the Sunday School special will become a regular part of the Sabbath schedule.

The Prussian government has cut its proposed settlement with the ex-Kaiser for the royal estates to \$3,375,000. Still that sum ought to keep Wilhelm in sawing-wood for some little time.

SOME SORT OF LIFE ON MARS, IS BELIEF OF NOTED ASTRONOMER

Prof. Fox Watching Planet Which Was Nearest Earth on October 27; Theories of Experts Given

Mars was 42,500,000 miles away from the earth on October 27 and Prof. Philip Fox of Dearborn Observatory of Northwestern university has been observing the planet nightly through the university telescope.

"Mars makes the circuit of the sun in 687 days," explained Prof. Fox in discussing the approaching phenomenon. "Its orbit has an average distance from the sun of a little more than 1 1/2 times the earth's distance. If the earth and Mars are together on the same side of the sun at a given date, the earth, making the circuit in 365 days, will gain a lap on Mars in an average of 780 days and again be in the position known as opposition.

"On account of the eccentricity of the orbits the distance at opposition may be anywhere from 35,000,000 to 61,000,000 miles. The closest approaches are at the oppositions which occur in the latter part of August. The last opposition occurred on the 22nd of August, 1924, at which time the distance was 34,600,000 miles. The approaching opposition will fall on the 27th of October, a little less than the average time between oppositions since the last one. The distance will be 42,500,000 miles. Since the planet is in the constellation of Taurus 15° north of the celestial equator, it is very favorably placed for observation from observatories of the northern hemisphere.

"During the opposition of 1924, Mars was far to the south of the equator in Aquarius and though nearer to the earth it was at all times low in the sky. Unfortunately for astronomical observing the telescopes are mounted at the bottom of a sea of air, a sea in which there is constant tumult, with currents and cross-currents of wind. The longer the path through the air, the more disturbance to the image. Though the planet will be farther away than during the opposition of 1924, its more favorable position will afford full compensation.

What Sort of World "What sort of a world is Mars, and why is there so much interest in it? Well, it boils down to this; of all the planets it offers conditions most like those on the earth and therefore most likely to sustain the forms of life with which we are familiar. Its axis is inclined at about the same angle to its orbital plane. The rotation period is but slightly longer than the earth's; therefore, the seasonal and diurnal changes are like ours. Snow-caps may be seen at the poles reaching well down toward the temperate zones in the Martian winter and shrinking with the advancing summer, sometimes melting entirely away. Other seasonal changes may be observed; the progressive darkening of certain fine lines designated as canals. One cannot observe Mars with studious care without being convinced that there is some form of life there, certainly vegetable life which quickens with the warmth of summer.

May Be Cold Planet "It has been argued," the astronomer continued, "that the distance of Mars from the sun would make it a frigid planet, too cold to sustain any form of life, that the atmosphere was thin, that the cloudless sky indicated little water vapor. But close observation reveals not infrequent clouds, perhaps habitual night clouds.

"During the war, photographic reconnaissance of the ground developed with amazing strides, plates taken from planes, interpreted by experts, were of the greatest value in revealing the enemy's installations, and in testing the effectiveness of the concealment of our own. Such observations could be made only on clear days and these were rare. In the latter days of the war it was found that by using plates sensitive to the red, haze and even thin clouds could be effectively penetrated and views could be obtained. Light from the red end of the spectrum will penetrate haze and mist where the blue cannot pass. For this reason the sun and moon are ruddy when seen near the horizon. During the last opposition of Mars, this principle was put into operation by members of the Lick Observatory staff. Mars was photographed alternately with ordinary plates and red-sensitive plates. The details of the planet's surface was revealed with amazingly greater clarity with the latter plates. The results pointed unmistakably to an atmosphere of considerable density laden with haze or mist. The old bogie of no air was overcome.

Probable Temperature "Again the temperature objections were removed by fairly consistent observations from Mt. Wilson Observatory and from Lowell Observatory at Flagstaff, Arizona, indicating a temperature in the Martian tropical region at least above freezing, the latter station finding a noonday temperature in excess of 50° Fahrenheit. But the poles are cold, ranging from zero to about -150° Fahrenheit. Also the dawn edge of the planet was exceedingly cold, indicating bitterly cold nights. Life, if existing there, must have adapted itself to the violent and rapid changes of temperature.

"Each opposition brings some new information about Mars, some hypothesis confirmed or abandoned. With the development of new instruments, new technique of observing, its riddles are gradually yielding their answers. But even to the layman the approaching planet, getting brighter each night, is a gorgeous sight in the eastern sky."

REMOVAL OF KINK IN CHICAGO RIVER

Removal of the costly kink in the Chicago river, a bend which now blocks five important downtown streets and meanders over an unnecessary four acres of valuable property, is assured by agreement of the 13 railroads whose tracks form a network in this area. Work is expected to begin in 30 days, Edward J. Noonan, railway terminals engineer, stated. The project, involving a cost to city and railroads of \$9,000,000 is expected to require about three years for completion.

Two railroad bridges and 30 acres of railroad tracks will receive new locations, Mr. Noonan explained. When this is done, and the new channel dug, four acres of land, valued at \$6,340, will be reclaimed, he added.

It begins to appear as if Broker Browning's dear little "Peaches" is not one of the cling variety.

State of Illinois, County of Lake, ss. IN THE PROBATE COURT OF SAID COUNTY

In the Matter of the Estate of Marinus Andersen, deceased, and in the Matter of the Application of Astrid Andersen, Administratrix of the Estate of Marinus Andersen, deceased, for leave to sell real estate to pay debts.

vs. Inga Andersen, Roy Andersen and Norman Andersen. PUBLIC NOTICE is hereby given that in pursuance of a decretal order made and entered of record on October 7, 1926, in the above entitled cause, in and by the Probate Court of Lake County, Illinois, at the October Term A. D. 1926 of said court, the undersigned, as Administratrix of the Estate of Marinus Andersen, deceased, will on Tuesday, the 16th day of November, A. D. 1926, at two o'clock in the afternoon of said day, sell at public venue at the premises herein described, in the City of Highland Park, in the County of Lake, in the State of Illinois, to the highest and best bidder for cash, all and singular the following described real estate, in said decree described, to-wit:

Lot three (3) - (except the west 46.82 feet thereof) in Block six (6) and the West 28 feet of Lot 2 in Block six (6) all in Exmoor Addition to Highland Park, in the West half of the Northwest quarter of Section 23, Township 43 North, Range 12, East of the Third Principal Meridian, in Lake County, Illinois, according to the plat thereof recorded July 11, 1903 as Doc. 91079 in Book F of Plats, pages 30 and 31, situated in the City of Highland Park, Lake County, Illinois, subject to the dower rights of Inga Andersen.

for the purpose of paying debts and claims against said estate, and costs and expenses of administration thereof.

Dated this 7th day of October, A. D. 1926.

ASTRID ANDERSEN, Administratrix of the Estate of Marinus Andersen, deceased. ERNEST S. GAIL, Attorney for Estate. 33-36

State of Illinois, County of Lake, ss. IN THE PROBATE COURT OF SAID COUNTY

In the Matter of the Estate of Alice Sullivan, deceased, and in the Matter of the Application of Richard Shannon as Executor under the Last Will and Testament of Alice Sullivan, deceased, for leave to sell real estate to pay debts.

vs. John L. Sullivan, Daniel Sullivan, Mary Johnson, Richard C. Shannon and William Holmes, Jr., Max Przyborski, Guardian ad Litem of William Holmes, Jr., a Minor.

PUBLIC NOTICE is hereby given that in pursuance of a decretal order made and entered of record on October 7, 1926, in the above entitled cause, in and by the Probate Court of Lake County, Illinois, at the October Term A. D. 1926 of said court, the undersigned, as Executor under the Last Will and Testament of Alice Sullivan, deceased, will on Tuesday, the 16th day of November, A. D. 1926, at eleven o'clock in the forenoon of said day, sell at public venue at the premises herein described, in the City of Highland Park, in the County of Lake, in the State of Illinois, to the highest and best bidder for cash, all and singular the following described real estate, in said decree described, to-wit: Lot twelve (12) in Block forty-two (42) in the City of Highland Park, Lake County, Illinois for the purpose of paying bequests, debts and claims against said estate, and costs and expenses of administration thereof.

Dated this 7th day of October, A. D. 1926.

RICHARD SHANNON, Executor under the Last Will and Testament of Alice Sullivan, deceased. ERNEST S. GAIL, Attorney for Estate. 33-36
