DEERFIELD DEFEATS WAUKEGAN LAST WEEK

Local High School Baseball Team Takes Game From Northerners

Waukegan high baseball nine is not as strong as it was rated as was easily proven when Coach Peel's Deerfield outfit journeyed north last week and gave the old rivals a decisive 8 to 1 setback. It was Waukegan's second defeat in league competition.

The boys representing the northern school helped Deerfield immensely. They made approximately a dozen very costly errors, our boys taking every advantage of them. The blue and white boys put up a fine brand of ball, playing an errorless game in the field. After the first inning when the Waukeganites collected three singles for their lone tally, "Pete" Harder had them "eating out of his hand."

Trees Trimmed Correctly

Proper pruning permits the neglect of no dead limbs no matter how far up or how inaccessible. This phase of tree culture demands extraordinary thoroughness, skill and courage. Dead and dying branches spread tree diseases and insects. Accidents are caused by decayed branches falling.

The Fundamental Principles of Tree Surgery

may be summarized as follows

- (1) the removal of all dead, decayed, diseased and injured wood and bark;
- (2) the sterilizing of all cut surfaces;
- (3) the water-proofing of cut surfaces;
- (4) aiding quick recovery, as by filling and covering deep cavities;
- (5) inspection, once or several times a year, to forestall the action of new defects that may arise.

Lynch Tree Surgeons work and live on the north shore. They know how to properly handle your Tree Surgery problems.

Pests and decay creep downward from the top. Skill and courage play a part in successfully controlling them by pruning.

Why Firestone GUM-DIPPED TIRES Wear Longer

WE recently were given the tremendous advantage of having the mammoth Firestone factories brought to us. In Tire Educational Meetings we were shown, by means of motion pictures, charts, tire samples and complete engineering data, the details of Firestone tire design and construction—and how Firestone and Oldfield tires and tubes are made in the world's most efficient and economical rubber factories.

Firestone pioneered the original low-pressure tire and made it practical by Gum-Dipping. The motion pictures showed us how the cords of the carcass are dipped in a rubber solution, thoroughly saturating and insulating every fiber of every cord with rubber. Simple demonstrations and tests illustrated the great advantage of this process, which supplies the extra strength to withstand the extra flexing strains of low-pressure construction—one of the reasons why Firestone Gum-Dipped Tires are establishing such unheard-of mileage records.

We learned why the Firestone Balloon Tread gives extra safety, comfort and long wear. We were shown why Firestone, from the very beginning, designed and continue to use the round Balloon Tread, minimizing "shoulder breaks", so destructive to tires. Excess rubber at the edges of a Balloon Tread is wasted—actually detrimental to tire mileage. In the Firestone Tread the small units and sharp projections are scientifically placed to permit easy flexing, resulting in extraordinary riding comfort.

Come in and let us put a set of these Gum-Dipped Tires on your car—you can forget about tire trouble. Quality is higher than ever before—prices are lowest in history. Buy now!
