

LAKE COUNTY MAY RECEIVE \$100,000

FROM GASOLINE TAX PLAN

Estimates For Other Counties In This District Given; Extensive Highway Improvement

A tremendous highway and street improvement program is to go forward immediately in Chicago and its metropolitan area and a contributing cause of the road building boom will be the much-discussed gas tax. Robert Kingery, general manager of the Chicago Regional Planning association, said in a recent interview.

The gasoline tax law, Mr. Kingery says in correcting a "popular impression" to the contrary, provides that the money apportioned to the several counties may be spent on state aid routes and these routes may be paved into a city of any size in Cook county.

Outside of Cook county, says the planning association officials, the routes may be paved into cities and villages having as high as 75,000 population in the last federal census. Cook county, he estimates, will receive nearly \$2,500,000 annually from the tax; DuPage \$90,000, Grundy \$25,000, Kane \$14,000, Lake \$100,000, McHenry \$50,000, Will \$110,000, Kendall \$15,000 and Kankakee \$52,000.

Provides for Additional Roads

"These amounts," says Mr. Kingery, "may be applied to state aid roads in these counties and their cities and will build from two to five miles each per year. The mileage is in addition to the mileage which will be built by the state highway department."

"State bond issue money and the gasoline tax money which goes to the state highway department may also be used inside those cities in which state aid money may be spent."

State and county highway authorities co-operating in the Regional Planning association plan that main thoroughfares—north, west and south—into the city of Chicago through adjoining suburbs be built by both state and counties in accordance with a plan of the Chicago Plan commission.

DODGE INTRODUCES "FASTEST FOUR" AUTO

Several pages have turned recently in the history of Dodge Brothers, but what appears to be by all odds the most important, is being revealed today. The company is bringing out what it claims is the fastest line of four cylinder cars in America, entirely new in every way, with price levels so far below those at which Dodge Brothers cars have always sold that the success of the new line seems assured from the start.

Less than six weeks ago Dodge Brothers brought out their remarkable new line of sixes and within a month had it established on a production basis equal to that of many large companies which have been making sixes for years.

But today's is probably the most remarkable announcement Dodge Brothers ever made—the "fastest fours" in America—priced to sell in tremendous volume.

Speed has never been a factor in their sale. Nor will it be made the paramount issue in marketing the new cars, it is said, although it is obviously a feature upon which the public will focus much attention.

Built with the distinctive beauty and completeness of appointment that characterizes custom-built cars, the new line is of the type that should sell readily on appearance as well as performance. The fact that the cars are capable of going 25 miles on a gallon of gasoline, at average touring speed, should also add greatly to their popularity.

Initial production will embrace three body types, a four-door sedan, a cabriolet roadster and a coupe. Only the sedan is available for delivery now but within a very short time the roadster and coupe will be in dealers' hands.

ELEVEN CARS DAMAGED SAME SPOT, SAME NIGHT

Authorities Are Investigating Smashup Near Libertyville Last Week

Authorities are investigating a series of accidents in which 11 cars were damaged, all occurring on Milwaukee avenue, south of Libertyville, one night last week. The series of accidents followed the crash of two machines, a Chevrolet and a Buick, both of which rolled into a ditch after the collision.

Within a few minutes after this accident a Ford truck and a Willys Knight touring car driven by a girl collided at the same spot and the automobile also rolled into the ditch near one of the other cars.

Two other machines, a Nash sedan and another Ford truck, neared the scene of the accident. The driver of the sedan, as he neared the accident put on the brakes. The Ford was following the other machine too closely to avoid crashing into the rear end of the Nash.

A few minutes later two more machines, one of which was a Dodge crashed head on and then a fitting climax to the series of accidents, three cars, a Studebaker, a Dodge and a Ford, collided, two of the machines also rolling into the ditch.

All of the machines were towed into a garage at Libertyville for repairs.

Only one occupant of the machines was injured. A man received a slight cut on one finger.

SUIT IS FILED OVER AUTOMOBILE ACCIDENT

Albert L. Seaman, Highland Park, last week started suit in the circuit court at Waukegan, through Attorney Fred O. Floberg, Chicago, against L. Chapin, for \$25,000 injuries sustained when a car driven by the woman last spring ran into his machine leaving him with permanent back injuries. The accident happened near Elgin. Seaman charges that the woman driver was negligent.
