The calendar reformers want a calendar of 13 months, and while they are about it, they should make the sun rise a little earlier on these dark mornings.

The time the young people used to give to the study of astronomy, seems to be devoted now to study of the movie stars.

PUBLIC LIBRARY

DO YOU KNOW?

That libraries offer the least expensive and most generally used form of recreation?

That one good book in a free library can give pleasure and profit to scores of readers?

That you are robbing children of a part of their heritage if you fail to provide them with suitable books?

That it is so important to teach children what to read as it is to teach them how to read?

How necessary it is that a child's taste for reading should be developed and directed by providing the kind of books that will establish a desire for the best in literature?

That a "balanced ration" in reading is just as necessary as it is in stock feeding?

That it is more unwise to oblige children to forage for their intellectual food than it is to force livestock to depend upon forage for subsistence?

What the state can do to assist in establishing and maintaining free libraries?
