

KIND OF PRESIDENT FACTOR OF INTEREST

MUCH DEPENDS ON CHOICE

Not True That Government Can Be Ignored No Matter Who Is at Head; Prosperity Is Affected

"The nation will be prosperous no matter who is its president" is the caption of an editorial printed in the Hearst newspapers.

It is true, says the National Republic, that it does not matter to the people of the United States who is president?

Common Belief There is an all too common belief that the national government runs of its own momentum; that it does not much matter what are its policies, the result is about the same.

The influence of our national executive upon national policies is very great. The presidency is a broadcasting station which reaches the ears of every American and of the whole world.

In Foreign Affairs In the field of foreign affairs the influence of the presidency is especially great. A president may initiate foreign policies which either in their acceptance or rejection profoundly affect the status of the government of the United States.

It is true that the prosperity and security of the United States does not depend upon the election of any one man to the presidency.

of a candidate for president who does not represent the popular will in reference to certain great national principles and policies, is a state ment that cannot be logically supported.

LITERARY YEARNERS COMMON IN NEW YORK

Every One Who Thinks He or She Can Write Tries to Reach Metropolis

Literary yearners fill the offices of advertising agencies and publishing houses in New York, declares Frances Warfield in "A Portrait of a Potential Authoress."

"Wherever she hails from, New York is her Mecca," says Miss Warfield. "She may come in, fresh-cheeked and husky, from Oregon's bleak reaches."

"She is her mother's daughter. Poor daddy is a little unsympathetic. Folks used to say that mother would be a great author some day."

Writing. "But mother never let fall the torch. All through little Mary's infancy she kept it glowing."

After tracing Mary's career through school and college, Miss Warfield continues:

"So Mary is graduated and turns a rapt visage to New York. Why does she not go home? Go home? Why, there are no authors at home; there are no publishing-houses at home."

COMMERCIAL USES OF WIRE PICTURES

UTILIZED IN MANY WAYS

News Value Is First But Business Men Quick to Adopt System When Time Is Special Factor

It is now only a little more than two and a half years since the commercial transmission of pictures by wire was first undertaken by the American Telephone and Telegraph company.

At the start it was believed that the principal use of telephotographs would be as news pictures in newspapers and for picture agencies. As a matter of fact, however, other commercial uses have proved of greater importance in America than newspaper use.

There has been a constantly increasing application of telephotographs to business purposes and this has been confined not merely to pictorial reproduction, but in many cases to long messages, typewriting or printed matter which has been transmitted by wire.

Legal Value The legal profession has found telephotography of value for the transmission of pictures which have been accepted as evidence in court.

In fact, the commercial uses of telephotographs are expanding rapidly, so that hardly a day passes that an emergency does not arise, necessitating their use in a new field.

A Kansas man after years of experimenting has perfected a seedless tomato. But the real benefactor of mankind will be the fellow who first produces a seedless watermelon.

"The Republican Party's sole object," says Senator Walsh, "is to make the men of wealth safe." This will include rich Democrats, of course.—Boston Globe.

NO IMMINENT LOSS FROM CORN BORER IS OPINION It will be twelve or fifteen years before Illinois suffers any severe monetary loss from the corn borer, Edwin Bay, Sangamon county farm adviser, believes. The ravages of the borer have been lessened in some areas, especially in parts of Ohio, where a clean-up campaign has been inaugurated at the instance of the United States government.

A German chemist is said to have invented a kind of ice which will stand a heat of 208 degrees before melting. Well, you may be able to think of one place where there will be a big demand for this.
