ORGANIZED IN 1911

Seventeen years of helpful service promoting the progress of Highland Park and the welfare of its people.

Always anxious to serve

Have You Visited It?

Our Travel Bureau, the new department of the bank, is now fully equipped and is already doing a flourishing business.

Miss Nunez, our manager, with wide experience in this line of endeavor, is making friends daily in Highland Park. She invites you to call, inspect this new department and learn some interesting things about a travel bureau.

HIGHLAND PARK STATE BANK

THE OLD RELIABLE AND PROGRESSIVE BANK

RAVINIA VILLAGE HOUSE DESCRIBED

Continued from page 1

pressed with the spaciousness of the big main auditorium the minute you step into the place. It should amply take care of our auditorium needs, dances, and other social functions for many years to come.

Main Auditorium
This main auditorium with a finished and gabled ceiling below its main supporting beams, will present a very attractive appearance, compared to the raw unfinished aspect of many auditoriums.

It will have a splendid, wide and deep stage, over which there will be a handsome proscenium arch. Our fellow Ravinian and artist, James C. Ewell, is now busy on plans for a decorative design for this arch, and the four gables which the architect has placed in other sections of this main hall.

At the west end of the auditorium we have a big alcove with a fireplace to remind us of the nook in our old Village House. This alcove will take much from the formality of the larger room, and prove a great adjunct to the place on social occasions.

The whole auditorium is well lighted with tall windows, and Mr. Van Bergen has succeeded in obviating the ugly window guards which indoor sports would otherwise make necessary by installing in the windows many small panes of clear plate wire glass, which will withstand the severest blow of a basketball or indoor baseball, and at the same time permit the free passage of light.

Heating System
The main auditorium and the large music room on the second floor are heated by Thermodyne Heating System units placed high in the walls. These units are similar to large automobile radiators. Steam is forced into them under pressure, and a large electric fan, placed back of the radiators, and blowing the air out through them, forces heated air to all corners of the room. Cold air ducts run from the floor up to these radiators, and the suction of the fans causes rapid air circulation, thus the heating system acts also as a ventilating system.

We are told that the stage and its lighting system is to be one of the finest in the country, and no doubt that is true, as the lighting is being carried out according to plans made by Mr. Arvid Crandall, the stage lighting expert who did the work for the Goodman Theatre in Chicago.

Stage light and auditorium lights as well, will be controlled by dimmers, and the auditorium light will be of the indirect type, located around the top of the side walls and throwing their light to the ceiling.

Dressing Rooms
For auditorium seats, which will be of a comfortable, folding-chair type, can be quickly removed and stored on trucks which slide out of the way and view on tracks beneath the stage.

To close the stage opening a beautiful plain velvet curtain will be provided, and for the stage proper there will be wing and back sets to harmonize with the whole effect sought.

The stage opening itself will be framed with handsome unpainted beams of wood smoothed and oil finished.

The first floor contains the main auditorium, stage and two dressing rooms, and, across a wide hallway, several other rooms, which will serve dual purposes for school and social events, East of the auditorium and reached through wide French doors which can be folded back so as to make it part of the main auditorium, is a large room with another fireplace. This room, which will be used for manual training work of the school, can be easily converted for use as a lounging parlor at social events.

Kitchen Facilities
At this side of the building there is also a large kitchen which is to be equipped for school domestic science purposes and serving the smaller social occasions. Coal rooms, dressing rooms and lavatories for men and women are also provided.

On the east side of the second floor a music room and two good sized class rooms are located. The music room, which is a large well-lighted room, 26x52 feet, capable of comfortably seating two hundred persons, will undoubtedly be the most used room in the building.

Besides furnishing excellent space for school musical activities, its raised platform at one end, cozy fireplace at the other end, high beamed ceiling, the beams of which are held in place with hand wrought angle irons and stays, its attractive iron and glazed glass lights hanging from the beams by chains, make it a most artistic and inviting place to hold the smaller civic and social activities of the community.

These are but a few of the attractive features of this fine Village House of ours. One must see them all for himself to realize just what a splendid addition this building is going to be to our community life.

The joint committee of the community organizations which, as the Auditorium Committee, has had charge of raising the community's share of the cost of the new building, and the architect, report that they have had the utmost in co-operation which could be consistently given them by the School Board in carrying out the desires of Ravinia citizens in providing the community with a building which would meet the social needs of Ravinia as well as the requirements of a first class school.

Express Appreciation
The Auditorium Committee is grateful to those subscribers to the Fund who have paid the first installment, or more of their subscription. Few have failed to pay their first installment, and those few who have not are urged to do so at once, as in April the second installment of the subscription will fall due.

Subscribers who are paying their subscriptions in the regular six months installments are asked to bear in mind that the second installment will be due next month, and that a prompt response upon receipt of your notice will be appreciated.

So far the collection work is being carried on by Mr. Howard Bede, the Treasurer of the Committee, gratuitously, and will be continued by him as long as subscribers keep down the

clerical work by their prompt response to installment notices.

The Chicago Title and Trust Company will make the collections for the committee on a 2 per cent basis, but subscribers can make this additional expense unnecessary by their prompt response to each installment notice as it comes due.

The Committee feels that there are still quite a few Ravinia citizens who would subscribe to the new Village House. Mr. James C. Ewell is heading a special committee to secure these subscriptions, and would appreciate any help you can give in urging your neighbor, if he has not subscribed, to make a subscription.

GIRL RESERVE TO HOLD FAIR AND DANCE

The Live Y'er club of high school girl reserves plan a penny fair which will run from four until seven, and all grade school girls who wish to attend are cordially invited. There will be a grab bag, food booths, fortune telling, stunt dancing, and many other attractions. If the floor of the roller skating rink is resurfaced by that time there will be roller skating.

In the evening there will be dancing from eight-thirty until eleven-thirty. Tickets are for sale by all club members and at the Y. W. C. A. There will be music by Wally's orchestra. Florence Glader is chairman of the committee in charge.

The profit which the club makes will be used to send as many delegates as possible to Girl Reserve summer conference at Camp Gray, Saugatuck, Michigan.

BOOKS ON GARDENING IN GREAT DEMAND

Since the last days of January cleared away any remaining thoughts of the holidays, garden books have been in demand at the Public Library.

The seed catalogues of all the best seed houses are now available for circulation together with the best books on many phases of the subject.

Here are a few of them: "The Gardener" by L. H. Bailey is a book of brief directions for the growing of common fruits, vegetables and flowers in the garden and about the house. Mr. Bailey is probably the most widely known American authority on horticulture. He has many books to his credit which are to be found on the library shelves.

"The Flower Garden Day by Day" is one of the last titles of that well-known author Mrs. Frances King.

Specialties now occupy the time of many garden lovers. Among books on your hobby are "The Culture of Perennials" by Dorothy Cloud; "Iris in the Little Garden" by E. P. McKinney; "The Little Book of Modern Dahlia Culture" by W. H. Waites; and "How to Grow Roses" by Robert Pyle.

Rock gardens are of great interest to many living on ravines. J. L. Cotter's "Simple Guide to Rock Gardening" and H. S. Adam's "Making a Rock Garden" offer valuable hints.

Pamphlets from the federal government and the state university also afford special material. Suggestions of your time-proven garden books are eagerly invited by the public library.

FEDERATION OF CLUBS HOLD ANNUAL MEETING

Elect New Officers March 28 at Meeting at Edgewater Beach Hotel

The Annual Meeting of the Federation of Clubs of the Tenth Congressional District of Illinois will be held on Wednesday, March 28 at the Edgewater Beach hotel with the North End club as hostess club. The Board Meeting at 9:30 o'clock will be followed at 10 o'clock by the district meeting. Mrs. Harry S. Gradle, President of the Tenth District will preside and will respond to the greeting of Mrs. William Westerlund, president of the North End club. Reports of officers, election of officers and regular business will fill the morning session. After luncheon a contest of Quartettes from the district will be held and Mrs. Walter Seymour, president of the I. F. W. C. will address the members.

Selection of members of boards of supervisors to serve on grand juries would be "clearly against public policy," Attorney General Oscar E. Carlstrom has informed the state's attorney at Sycamore.

CITY SELLS BONDS RECENTLY APPROVED

Continued from page 1

with reference to sidewalk on Woodland road was ordered placed on file.

The City Clerk was instructed to notify Mr. W. H. McKillip that it would be impossible to construct sidewalks in accordance with his request on Deerfield Road until drainage had been provided for.

Sewer Repairs
Commissioner Brown moved that the communication from Baird & Warner with reference to repairs to be made to the sanitary sewer in the ravine on the easterly side of the south Sheridan road bridge be referred to Windes & Marsh. The motion prevailed.

The Chicago Federation of Aged and Adult Charities was granted permission to hold their annual tag day in Highland Park on May 14, 1928. The communication from John Rosen was received and placed on file.

To Recommend Architect
The City Clerk was instructed to write to the Council of Architects of Highland Park and request them to make a recommendation to the Council for an architect to be engaged by the City on the new City Hall and other Municipal buildings.

Commissioner Gourley moved the final adoption of the resolution with respect to sale of \$100,000 Corporate Purpose Bonds, \$150,000 Street Widening Bonds, \$85,000 Bridge Bonds, \$55,000 City Hall Bonds, \$25,000 Municipal Yard Bonds, \$100,000 Library Site Bonds and \$25,000 Fire Station Bonds, said resolution having been filed for public inspection for one week as provided by law. The motion prevailed. The bonds were sold at Par.

Special Counsel
Motions were carried for adoption of resolutions retaining and employing Thomas E. Murphy as special counsel for the City of Highland Park in connection with Special Assessments Nos. 322 for the construction of a connected system of water mains in Woodridge Subdivision, No. 324 for the construction of a connected system of water mains in Geo. F. Nixon & Co.'s Highland Park Acres, No. 325 for the construction of a connected system of water mains
