CURTIS SYSTEM OF PIANO INSTRUCTION

Offer Free Class This Summer at Holy Ghost Academy

It is natural for all children to be musical. Therefore all children should have that gift developed to whatever degree they possess it—by musical study.

In order to give every child the opportunity of having instructions in piano, piano classes were formed about twenty-four years ago. They have been so successful from the first that today they are attracting the attention of parents all over the country.

Statistics have proved that in a given time children of like ability accomplish more in a class than they do in private work.

The spirit of comradeship and rivalry are powerful factors in gaining results in a class. The spirit of rivalry arouses interest and enthusiasm which results in strenuous and willing application on the part of the pupils not only in home practice, but during the class without the urging of the teacher or the parent and this brings results.

It is partly because of this interest and enthusiasm that class piano lessons are so successful. Modern educational methods are used in presenting the work. As a result it is almost unbelievable what the children can accomplish in a year's time. The first year's work includes the fundamentals of harmony and rhythm, the construction of all the major and minor scales, transposition, ear training, quick sight reading, notation, technique, analysis, and interpretation and original composition work. After getting a firm foundation in class work then the pupil is ready for private work.

The price of the class lesson is much less to each pupil, than that of the private lesson. That makes it possible for every child to have the benefit of starting a musical education and gives their parents an opportunity of finding out how much talent their child has. At a small cost. In all places where children are learning to play the piano they are happy over their work, because they feel they are accomplishing so much—and the parents are very enthusiastic over the results, children, boys and girls adult classes are proving very successful. The piano department of the Holy Ghost academy, Techny, Ill., offers this summer, a six weeks free course in class piano instructions with two lessons per week beginning July 10, 1928. The lessons will be given on

Tuesdays and Friday, from 8:45 a. m. to 9:45 a. m., standard time.

Applications should be made in time as the number of pupils of this class is limited at the end of this six weeks instructions demonstration will be given to the parents and friends of the pupils. For future information apply to Music Department, Holy Ghost academy, Techny, Ill.; Mrs. Henry Therrien Northbrook.

FT. SHERIDAN TO BE MADE BEAUTY SPOT

(Continued from page 1)

and years ago. It was first planned to remove these unsightly discolorations by means of sand blast or some acid process which would renew their original appearance. However, these methods were found to be injurious to the materials, and that plan had to be abandoned. Now it is the scheme to capitalize on the age of these buildings insofar as it is possible. This will be accomplished mainly by the use of ivy and other clinging vines. Of course, there can be no immediate results or even within a few years, these buildings will justify this method of improvement.

The various unsightly features of the landscape have been taken under consideration by a prominent Chicago

landscape architect. Shrubby will be placed so as to obliterate points of buildings, unsightly outhouses and other unattractive lines. Unnecessary paths and wagon tracks will be obliterated and proper thoroughfares outlined.

Shrubby in groups will be arranged to obtain greater artistic values from available plants. The plan of procedure will be to determine what situations are critically in need of improvement, and to concentrate upon those points in the order of their relative importance. The methods used in the earlier cases will be applied later in the other situations.

Roads Being Improved
In co-operation with various civilian highway commissioners in the vicinity of Fort Sheridan, the roads are to be resurfaced and improved, insuring much more comfortable passage to the automobile traffic which passes through the reservation in great daily volume. The entrances to the post are to be improved in every manner possible.

Practically all of this work has been started since the arrival of Major General Malone as commandant at the post and with his reputation as an efficient executive and "go-getter" there is every reason to expect that the entire plan will be carried out with the result that the army reservation will be soon one of the North Shore beauty spots.
