

RAREST OF DUCKS SHOWN IN MUSEUM

SPECIES NOW IS EXTINCT

Specimen of Labrador Duck in Possession of Institution in Chicago; Valued at Five Thousand

A duck such as no present day sportsman can hope to bag, a single specimen of which is valued at more than \$5,000, is included in a new exhibit containing all species of ducks found in North America, preparation of which has just been completed at Field Museum of Natural History. The exhibit will be opened to the public tomorrow, Stephen C. Simms, acting director of the museum announces, and it is expected to be of special interest to hunters.

Rarest of All Ducks
The \$5,000 specimen is the rarest of all ducks, the extinct Labrador duck, of which specimens are scarcer even than of the famous extinct great auk, according to Dr. Wilfred Osgood, curator of zoology. Field Museum possesses two specimens of the bird, a male and a female. Only the female is included in the exhibit; the condition of the male specimen does not warrant its use in this kind of exhibit, but a replica of it, skillfully made from feathers of other birds, has been placed on display. In the whole world only about 45 specimens of this rare duck have been preserved, declares Dr. Osgood. The bird formerly inhabited the northeast coast of America, and suddenly became extinct more than fifty years ago, since which time no living example of it has been seen, says Dr. Osgood.

Forty Species
In all, forty species of duck are shown. In order to make the exhibit of most service to local sportsmen, all species which are found in Illinois are designated by red stars on the descriptive labels accompanying the specimens. The hunter who bags a bird which is strange to him, whether it be from Illinois or elsewhere, can identify its species by consulting this exhibit.

One section of the exhibit is devoted to the so-called river ducks; another section to the sea ducks. The well-known mallard, pintail, teal, widgeon, wood, black, canvas-back, Harlequin and other favorite ducks of the sportsman are all conspicuous in the collection. Included also are certain old world types which occur accidentally on this continent.

From Arctic Regions
A number of the northern species of duck in the exhibit were obtained by the Rawson-MacMillan Subarctic Expedition of Field Museum, and the John Borden-Field Museum Alaska-Arctic Expedition. Most of the species are represented by both a male and female specimen. The birds were mounted and arranged by Ashley Hine of the museum's staff of taxidermists, who also collected many of them.

It seems to us that they may carry this thing too far. Now some Englishman has written a poem about the transatlantic fliers.

CHICAGO WILL HAVE MESSAGE FOR WORLD

AT WORLD'S FAIR, IN 1933

Harry E. Freund, Addressing Association of '93ers, Says It Is Great Opportunity for Progress

"Chicago will have a world message at the Chicago Centennial Celebration of 1933," said Harry Edward Freund in an address before the Association of '93-ers at the weekly luncheon meeting held at the Hotel Bismarck recently.

"The unrivalled opportunity for advancing world civilization and world progress is the foremost thought of the projectors of the Chicago World's Fair, for it will typify the best and highest phases of America of today. It is fully and thoroughly understood by the representative men and women at the head of this grand and glorious undertaking that the lasting influence of the World's Fair must be of that character that will prove beneficial to all nations and must bring to the people of both the new and the old worlds, practical and constructive ideas in industry, commerce, finance, science, education, the professions and the arts all for the happiness of mankind.

Lasting Influence
"Important and vital as are the material features of the World's Fair, which will involve the expenditure of many, many millions of dollars, there must be a deeper spiritual significance, as the result of this international exposition for a better understanding of life's true values. For out of it all must come the recognition that the study and advancement of mankind is the test of a nation's civilization.

The Real Chicago
"The real Chicago is now being discovered with its wonderful destiny to prove to the world at large its cultural and educational leadership in the United States, as exemplified by its two great universities and many other important factors, its broad and human purpose, its generous emotions, its noble and unstinted philanthropy, its undaunted courage and its sincere realization of a mission to the entire world.
"The melton pot of America has been found in Chicago and it is inspiring to witness the enthusiastic support given by the representatives of over thirty racial groups at their

meetings called to hear the reports on the membership enrollments for the World's Fair legion 1933.

"The spirit of unity, harmonious action and co-operation is contagious, as the leaders of the Chicago racial groups tender their whole hearted support to the Chicago centennial celebration. It reflects the faith that promises to make the World's Fair an unprecedented success.

"International in its scope, far-reaching in its influence and spirituality to all quarters of the globe, the World's Fair of 1933, with the backing of 80 per cent of Chicago population, will mark an epoch in the twentieth century.

Nations Represented
"Among the nationalities enlisted in the cause are German, French, Swiss, Italian, Polish, Norwegian, Swedish, Japanese, Chinese, Russian, Belgian, Greek, Bulgarian, Finnish, Lithuanian, French-Canadian, Danish, Serb, Slovene, Croats, Assyrian, Ukrainians, Slovaks, Hungarian, Czechoslovak.

"The daily newspaper of Chicago including those printed in foreign languages are giving the World's Fair splendid support in every possible manner, devoting columns and pages of space including editorials, even at this date, five years before the World's Fair. Thus is the Chicago press ever ready and willing with its publicity for civic pride and fame of its city.

"Chicago bids the world welcome to its centennial celebration which will accomplish more for world peace and understanding than all the League of nations and world courts combined.

"Chicago will create new world history in 1933, bringing from this country to all nations its heartfelt message of good will, thus carrying out its destiny."

RAISES BIG FUND BY SELLING WASTE PAPER

One time when it doesn't pay to be popular is when the commencement and wedding invitations are mailed out.

The seal for thrift which during the war prompted people to save silver and tin foil, fruit pits and old paper, has largely evaporated. The patriotic spur to action is gone.
Portland, Ore., has found a new motive power in civic pride. Last week it conducted an intensive "paper drive" as part of a clean-up campaign to remove fire hazards and to tidy up for its Rose Festival. Hundred of school children and Boy Scouts brought bundles of old newspapers, magazines and scrap paper to the fire stations. There it was weighed and paid for. A total of 800,000 tons was collected and then shipped to the Pacific Waste-paper Company at Longview, where it will be made into strawboard. The city was thoroughly cleaned of old papers and the army of youngsters received about \$6,000 for their work.—New York Times.

If they ever have a revolution in Italy and Mussolini is thrown out of work, its our opinion he can always get a job in the United States as a big league umpire.

When it comes to hearing the speeches at national conventions a radio is a lot better equipment now than a ticket for a seat in the gallery.

Why is it that a girl doesn't object to being told that she has shining eyes but gets peeved if you tell her she has a shiny nose?

Did you ever notice the disappointed look on daughter's face when it turns out that the 7:30 telephone call happened to be for father?

THE WORLD HAS A NEW AND FINER MOTOR CAR

Twin Ignition means Power, Speed, Economy
People who already have driven the new Twin-Ignition-motored Nash "400" have instantly realized its superiority in performance to cars with older types of motors.
In this new car, they discover more power and speed than they will ever care to use. They find a real thrill in the snap of Twin-Ignition traffic getaway.
Has Nash accomplished these remarkable results by building a larger motor—one with an enormous appetite for gasoline?
Or by building a high-compression motor that needs special, high-priced fuels?
The answer to both questions is, "No". Nash has developed new principles of high-compression motor construction which create more power, more speed, with ordinary gasoline, and less of it!
Today the Twin-Ignition, 12-spark-plug, high-compression motor powers all Nash "400" Advanced and Special Six models.
We'll let you drive a Twin-Ignition-motored Nash "400", anytime.
