Tax assessors of the District of Columbia estimate that the White House and the grounds surrounding it are worth about \$22,000,000. Only two Federal properties, the Capitol, and the Treasury Department Building, are valued at higher figures.

The Fascisti over in Italy are talking about abolishing handshaking. We suppose this is the first step toward abolishing the candidate entirely.

FIRE PREVENTION PROCLAMATION OUT

ISSUED BY GOVERNOR

Urgent Observance of Week of Oct. 7 to 13 to Emphasize Need of Reduction of Fire Hazards

Every city and town in the state of Illinois will join in the fight against fires and the best methods are outlined in Gov. Small's proclamation which follows:

Proclamation
To the people of Illinois greeting: Illinois contributed \$21,961,452 to the national fire waste last year. This means the destruction of property by fire at the rate of more than \$2,500 an hour.

Property destroyed by fire is a net economic loss. Insurance does not bring back the property. It simply reimburses the owners. It comes out of the pockets of the public, who pay the premiums. Hence the public should be vitally interested in reducing losses.

In addition, 104 persons lost their lives in Illinois last year through fire or burns and 159 were injured or maimed.

Ordinary carefulness and attention to simple fire hazards would prevent 90 per cent of all fires.

Now, therefore, I, Len Small, governor of Illinois, do hereby appoint and proclaim the week from Oct. 7 to Oct. 13, 1928, to be observed in the state of Illinois as Fire Prevention week.

This is an appropriate time to see that heating plants and flues are cleaned out, inspected and put in safe condition for winter use; that premises are thoroughly cleaned up and rubbish burned; that electrical wiring and gas connections are checked for hazards; that gasoline, oils, paints, varnishes and similar inflammables are safely stored.

Business men and manufacturers should see that their places are kept free from unnecessary fire hazards, that inflammable materials are safely stored and that hazardous processes are strictly safeguarded.

Those in charge of schools, theaters, hospitals, churches, hotels, public halls and other public places are required by law to maintain satisfactory fire escapes and exit facilities and keep their buildings safe from fire. Fire drills should be conducted, especially in the schools.

City and village officials can control fire hazards effectively by proper ordinances and inspection of property. They should do this wholeheartedly.

A practical observance of Fire Prevention week should be held in every community so as to impress on the public the necessity of preventing fires. Mayors, fire chiefs, chambers of commerce and civic organizations should co-operate to this end. Instructive talks should be given in the schools and civic organizations should devote their meetings during this week to fire prevention. Co-operation of press and pulpit is invited.
(Signed) Len Small.
