BUYING AUTOS FOR CROSS-COUNTRY TOURS

Automobile dealers throughout the country are experiencing an unprecedented demand for cars from buyers contemplating cross-country tours, and it is believed that the summer of 1928 will witness a continuous movement of automobile tourists and vacationists both east and west across the continent over the border into Canada, and south to the Gulf of Mexico, reports a bulletin issued by the touring bureau of the Chicago Motor club.

There are thousands of miles of paved and improved roads extending from coast to coast, with their radial connections, and it is freely predicted that this summer will see the greatest interstate and inter-sectional travel in American motor annals.

PRIVATE CARS MAY ENTER YOSEMITE PARK

No Charge Made for Permit, If Auto Is Used for Pleasure, Explained

No change has been made in the regulations regarding commercial cars entering Yosemite National Park, the touring bureau of the Chicago Motor club announces. Cars for hire carrying commercial licenses will not be admitted to the park. This information was secured from E. P. Leavitt, acting superintendent of Yosemite, following rumors that the government ban on commercial cars had been lifted.

A commercial car driven by the owner will be admitted to the park if the owner satisfies the checking rangers that the car is being used for a pleasure trip only, the Chicago Motor club bulletin points out. Motor buses on educational tours, or commercial tours where a special permit has been secured to visit several national parks on one tour, are admitted on payment of certain fees.
