an increasing world of cars, the Buick will shortly augment sales by the addition of the lower priced field.

ground up — new car will bring to free of performance, less and comfort quarter century of fine car pro- cesses possible at such product will have future design and Buick car. In type, lead six. It will be Buick retail sales

ation of this new has been the aim of company to design appeal—a car that reach of millions quality car perform- hat having two or a single family is common practice in ck Motor company high quality and of its new product ining influence in mand of the new American family.

**Exhibition of Work Done in Settlements**

An exhibition of the work done in the Chicago Settlements has just been opened in the Children's Museum at the Art Institute. The Hull House Art school is divided into two groups —adult and children. Both groups paint, etch, and do applied art. The work is modern or conservative, imaginative or naturalistic, according to the personality of the artists. Clay is the chief material used in their applied art classes. Others crafts sometimes taught there are textile

decoration, woodwork, and linoleum block. The adults work in the evening and Saturday afternoons mainly, while the children work after school or early evening. The adult department is directed by Miss E. Benedict, the children's department by Miss Norah Hamilton, the etching by Mr. M. Topchevsky and the clay work by Mrs. M. M. French.

A St. Louis court held the other day that in spite of the Darwin theory a monkey is still a monkey and has no legal status. This is quite a blow to the evolutionists.
