

Special Offer! - - - This OVEN COOKING SET

and a
10%
Allowance
on your old
cook stove

with each CLARK-JEWEL or RELIABLE Red Wheel Gas Range

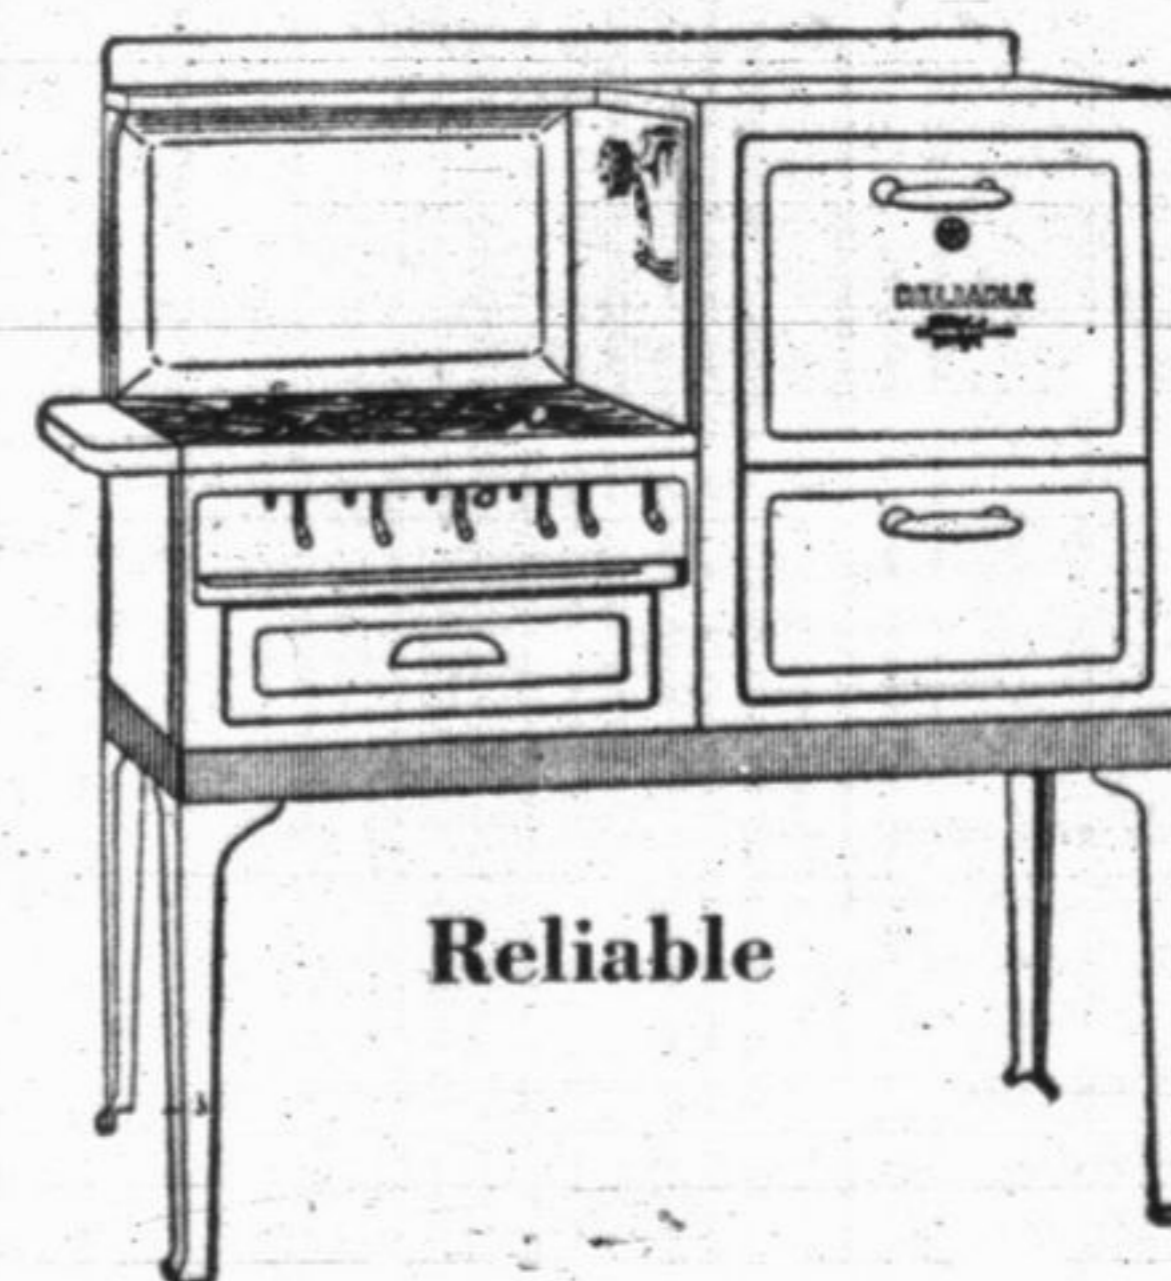

Cook your foods—whole meals—in an oven with a heat control. Best results can be had every time only when you “measure the heat” just as you measure the ingredients of the food you cook.

“Measured heat” is made possible when you use a Clark-Jewel or Reliable Gas Range, for these ranges are equipped with the famous Red Wheel Heat Regulator. You set the regulator at the temperature you want—and the oven will remain at that temperature until you turn off the gas.

Clark-Jewel

You have hours of freedom from the kitchen when you use a Red Wheel Gas Range, for *the oven will not overheat* while you are away. Leave home for an entire afternoon if you wish. Return just in time to place the meal on the table. That's the simple, time and labor saving method thousands of modern women are using. You can, too! Just take advantage of our remarkable, special offer NOW!
