

LAWSONIA COUNTRY CLUB ATTRACTIVE

Lawsonia on Green Lake, Wis. of Interest to North Shore Residents

Many residents and golf club members of the north shore area are interested in the opening, May 30, of the new home of Chicago's newest and smartest out-door colony, the Lawsonia Country club, in the heart of rural Wisconsin on the shores of Green Lake.

The recently-completed \$1,000,000 club house, designed by Benjamin H. Marshall and decorated by Mrs. John Alden Carpenter, occupies the site of the old Victor F. Lawson residence on Lone Tree point, one of the most picturesque spots on the lake. With its outdoor swimming pool, its promenades and gay awnings, this rendezvous of Chicago's smart set will suggest a bit of the Lido or Deauville.

The club occupies a tract of 1,400 acres, with four miles of shore line and with miles of automobile drives and bridle paths winding in and out among the wooded hills. It was on this estate that its former master, Mr. Lawson, lavished millions of dollars and years of care. It has been acquired recently by a group of wealthy Chicagoans for club purposes, where such sports as golfing, yachting, motor-boating, fishing, achery, and fox-hunting may be enjoyed by members.

Bird Refuge

In the club grounds, wild life is safe, for the entire tract is set apart as an Audubon society bird refuge. The motorist or the equestrian almost at every turn will startle a pheasant, a covey of quail or partridge, or a lone woodcock. More than 136 varieties of birds have been observed there in a single season, and Lawsonia is in the path of the wild duck migration.

Every species of tree and shrub known to the north temperate zone will be found there. In addition to the 1,750,000 trees, one of America's most lavish display of lilacs is just now in full bloom. These are all French varieties, including such rare species as Mme. Perrier, Congo, Jules Le Blanc, Mme. Andre, and President Louvet.

Supplementing the present 18-hole golf course, a new \$250,000 course, designed by Langford & Moreau is under construction, and will be ready for play by August.

Picturesque Buildings

Among the picturesque buildings on the grounds are the privately-owned Anne Hathaway cottage and Glengary, a thatch-roofed lodge remodeled from an old stone barn; and the 75-year-old log cabin on the now grass-grown Green Bay-Marquette coach road, used as a summer residence by Charles E. Matthews of Oak Park.

The club is supplied with fresh vegetables and fruits from the greenhouses which were once the pride of Mr. Lawson, while a herd of blue-ribbed Guernseys, also an inheritance from the Lawson regime, furnishes the dairy products.

An aviation field, as well as a landing in the yacht harbor for amphibians, will afford accommodations to week-end guests who elect to wing their way to this Wisconsin paradise from Chicago or the north shore villages.

The Hawaiian Islands are said to have the same temperature all the year around. But the Hawaiians are a clever people, and have found other ways to start a conversation.—Detroit News.

Again! Hattstrom & Sanders Evanston, Highla

We Are Celebrating Our 5th

For EVANSTON

Our Evanston store has been completely remodeled and enlarged to accommodate increased business. New fixtures have been installed throughout.

We have trebled the size of our lens grinding plants, adding new modern machinery and equipment which will enable us to still better our past superior service. We are now able to grind the most complicated lens in a shorter space of time.

Not only do we grind lenses of all kinds from the raw glass product, but we also make our own tools and dies to grind lenses with which to insure absolute accuracy. This is the only plant of its kind to be found between Chicago and Milwaukee.

The Photographic Department has increased facilities also. Motion picture apparatus of every make and description in stock. A larger film library with feature and educational pictures for sale and rental purposes, also.

Personnel of all departments has been increased.

The "Modette" represents the ultimate in last minute eyeglass and spectacle wear. It is the finest article made, optically, and is the most comfortable nose bridge ever devised.

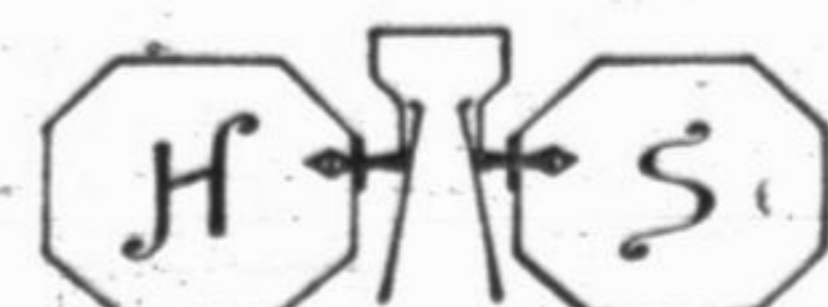

The bridge arch is of spring construction which allows a zephyr-like adjustment, the wearer never being conscious of the weight of his glasses.

Large, smooth nose pads distribute the bearing surfaces over a large area, thus promoting comfort and preventing skin cuts and irritations.

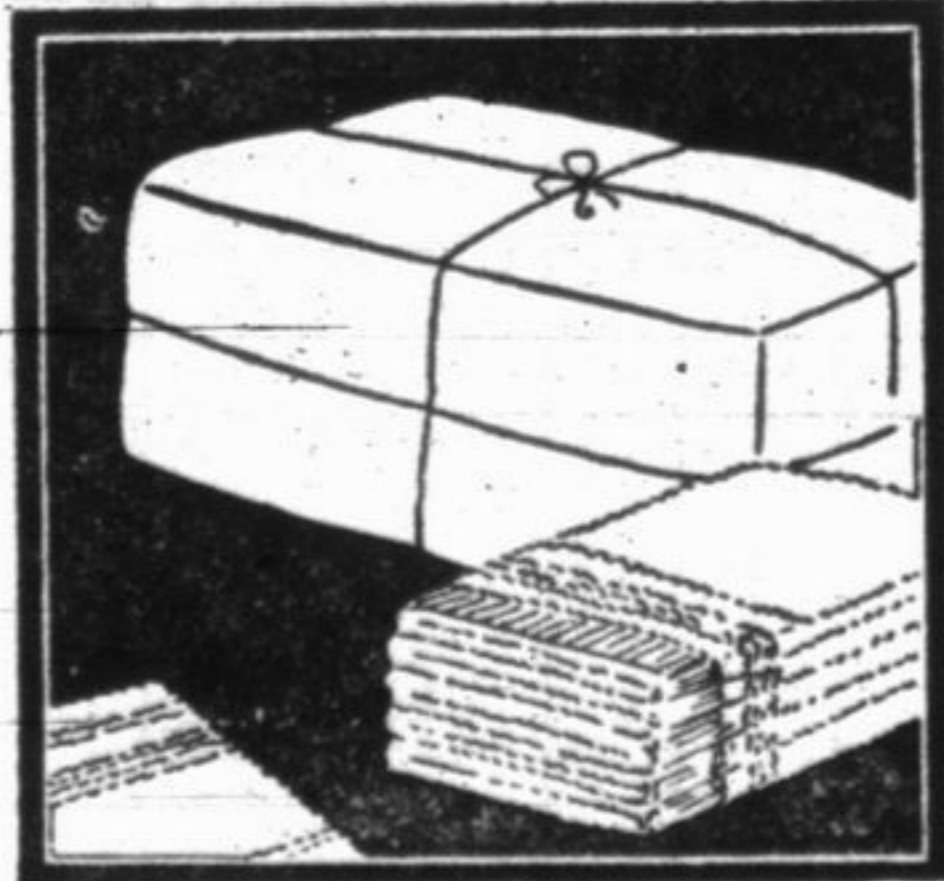

This being our 5th anniversary, thanking our many friends and splendid success.

Believing that Evanston and Eyeglass Service that was different goal in mind. That we have a in the old adage, the proof of been with our service, satisfied party to recommend us to their friends tary missionary work on their part.
