**SUSI'S AIRSHIP.
OTHER AIR NEWS.
\$20,000,000 A YEAR.
THE KING RETURNS.**

Susi, female gorilla, passenger on the Graf Zeppelin, interests the crowd more than the real lady passenger.

Susi slept or rested calmly in her cage, through all the high wind and buffeting.

Proud man thinks, "Poor Susi, she did not even know she was floating through the clouds in an airship. Man set her sailing, she had nothing to say about it."

What about us, Susi's second cousins? Not one in 10,000 white men realize that he is afloat in space, on an airship, the earth. God set us floating, as Susi's owners set her flying.

It's a wonderful airship that we inhabit, heavier than if made of solid steel, whirling round and round, its slowest speed 1,000 miles an hour, on its axis, its speed around the sun more than 1,500,000 miles a day, 60,000 miles an hour, 1,000 miles a minute.

Ours is a real airship going off through space somewhere, with the sun. And we know and think as little about our real journey as Susi knew and thought about her trip.

Don't despise Susi.

Human nature is fundamentally good with all its fighting and slaughtering. The French hesitated to let the Zeppelin fly over French territory—too many opportunities for taking photographs, useful in later wars, perhaps.

But when the big ship was in trouble, French soldiers were sent to help, French landing fields and hangars were offered, and at this hour, French and German mechanics are working side by side, putting the big dirigible in order.

Colonel Lindbergh announces regular mail service between New York and Buenos Ayres in eighty hours. Later the line will be extended, and Lindbergh will start the line, as pilot. Marriage, evidently, will not moderate his flying.

Those that oppose the debenture scheme for "farm relief" announce with horror that the "farm bounty plan" might cost the Treasury \$200,000,000 a year. That wouldn't be much if it gave genuine farm relief.

King George has returned to his favorite residence, Windsor Castle, with years of life promised by doctors.

Loyal subjects turned out to cheer their king.

Newspapers print his picture headed "Long to Reign Over Us."

The idea that men do not want to be ruled is a mistake. To be ruled is exactly what they do want, and

to be freed from responsibility of self rule.

It is painful for a dog to walk on its hind legs, painful for human beings to rule themselves and think for themselves.

Cuba Man Electrocuting Raising Flagstaff for Memorial Day Purposes

His life was the price—that Henry Witthuhn, 50 years old, paid for his patriotism when he was electrocuted while erecting a flag pole on a subdivision in Cuba township where he was employed, May 29.

Witthuhn in his eagerness to erect the flag pole so that the national

banner might be raised on it on Memorial Day allowing the pole to touch the high voltage wires of the Public Service company.

Another Escapes Death

He was being assisted in the job by Harold Kelsey, county supervisor from Cuba township and owner of the subdivision in which Witthuhn was employed. Kelsey tried to save Witthuhn but received a severe shock when he grasped him.

It is believed that Witthuhn was instantly killed although extended efforts were made to revive the man. The hands of the victim clung to the pole ten minutes before they could be released.

Witthuhn has been in the employ of Mr. Kelsey for years as a farm hand, it is stated.

The fact that the flow of current through the body of Witthuhn broke the strength of the shock probably prevented Kelsey from being electrocuted.

Dr. J. L. Taylor, county coroner, started an investigation into the death Friday and as a result of the inquest verdict was that death was accidental.

People are said to need a greater attention capacity, but among the married couples the contention capacity seems to be greater.

These boys who refuse to study their lessons might as well give up the idea that Thomas A. Edison will select any one of them as the one to carry on his scientific work.

Every Pane—front, side and rear—is Security-Plate Glass

Protection against flying glass is among the fundamental improvements in the Cadillac program for producing the finest cars that can be built.

Present day traffic conditions, with higher speeds and constantly increasing number of cars, call for the greatest precautions. You should select a car that is safe. When you eliminate the possibility of flying glass, you have taken a practical step towards complete motoring security. Tests prove that Security-Plate cracks under severe blows—but it does not shatter. We suggest that you see in our sales-rooms, the glass which has passed through an accident.

On the foundation stone of Cadillac Nation-wide Service are placed the fundamental and exclusive mechanical advantages of 1929 Cadillacs and LaSalle. And these are surmounted by a distinct beauty of line and color that completes the Cadillac program for the permanent satisfaction of Cadillac and LaSalle owners.

- 1 Smartness and style, inside and out.
- 2 Silent Shift Transmission permits gear changes at any speed without clashing.
- 3 Security-Plate Glass in all windows means safety.
- 4 Duplex Four-Wheel Brakes—a touch of the pedal stops your car.
- 5 An even more powerful and smoother running Cadillac—built, 90-degree, V-type 8.
- 6 Wonderfully easy steering.
- 7 Adjustable front seat places brake and clutch pedals within easy reach of any driver.
- 8 Pneumatic control principle applied to Fisher bodies assures quietness.
- 9 Chromium plated exterior nickel parts provide permanent sheen.
- 10 Nation-wide service—Cadillac Service.
