"Very Latest"

by Cecile

The tiny hat that can be rolled into
a small package and tucked away in a
corner of the suitcase or hat box, is
indispensable to the bride's wardrobe,
likewise to that of the vacationist.

And in the front rank of fashion we
find one of its most effective types—
the close-fitting tricot turban that
swathes the head in flattering folds.

Illustrated is a youthful version of
the moment—an original design by
Sally Milgrim, featuring black and
white honeycomb tricot in a model
suitable for afternoon. There are
limitless versions of the theme for
street, afternoon, sports and evening
—all of a size and texture that permit
them to travel most expertly, and in
the smallest possible space.

All in the Game of Sun-Burn

In order to get just the right tones
for the new "sunburn" shades one
silk company has gone so far as to
have color specialists study subjects

at the fashionable beaches and has ac-
tually conducted tests of human skin
in the laboratory. The result is the
creation of sixteen tones for dress
fabrics, a subtle shade for each com-
plexion, and each named after the
place where the original "tan" was
acquired. They run thusly: Gulf
Stream, Delray, Asheville, Belleair,
Florida, Daytona, Panama, Bermuda,
Ormond Palm Beach, Everglades, Mi-
ami, Georgia, Pinehurst, Nassau and
Hollywood. Take your choice—you'll
be beautifully "sun-burned" in any
of the group!

Longer Gloves for Street Wear

As a logical outgrowth of the sleeve-
less frock, new gloves are longer,
approaching the length familiarly
known as "six-button." Pull-ons or
mousquetaires and those having one
or two-button fastenings at the wrist
are the most popular models.

How to Keep from Growing Old

1. Drive as fast as you can on wet
pavements. There is always some-
thing to stop you if you loose control
—often a heavy truck of a plate glass
windows.
2. New drivers should be shown
how to drive fast in heavy traffic.
It gives them the experience every
motorist should have.
3. Always speed! It looks as
though you are a man of pep though
an amateur driver.
4. Demand half the road—the mid-
dle half. Insist upon your rights.
5. Always race with locomotives to
crossings. Engineers like it. It
breaks the monotony of their jobs.
