**HINTS FOR THE  
HOME**

The average rural family consumes almost five tons of food annually, or, to be exact, 9,371 pounds, according to the figures of the Toledo Scale company compiled a short time ago. Of this amount the average man accounts for 2,177.7 pounds, or slightly less than one-quarter of the family's food. (This small percentage was as much of a surprise to us as to you!)

The largest single item of food consumed is milk—2,669 pounds being consumed annually. And the average farm family uses 484 pounds of eggs a year. Speaking in dollars and cents—of every dollar spent by Americans for food, 24.8 cents goes for milk and milk products. This is by far the largest single item in our food bill. It explains why doctors, inventors, business men and public commissions are constantly trying to devise ways to safeguard the quality and purity of milk.

**A Good Summer Dish**

Make a batter using 1 pint flour, 3 beaten eggs and 1 pint milk. Beat until free of lumps, then add 1/2 pint canned minced clams and juice. Fry batter as you would batter cakes. Nice served with fresh stewed tomatoes.

**Serving Left-Over Rice**

Cold rice may be re-heated by steaming and served on a platter surrounded with carrots and peas and grilled tomatoes. Or add to cold rice enough thick cream to make of a good consistency for re-heating. Season with pepper, add a lump of butter and serve instead of potatoes.

**A Remedy for Warts
