### HINTS FOR THE ∞ HOME ∞

Thursday, August 8, 1929

It is just common sense to use packfoods wherever possible. Dust and personal handling, germs and whatnot are kept from these foods where it is impossible to give bulk foods the same protection. This is one of the so-called "food fads" that one may indulge in without fear of contradiction from any source, for in helping to keep foods fresh it contributes as much to economy as it does to health.

Another so-called fad that is acknowledged to be good practice is the habit of choosing foods that are not over-refined. This applies chiefly to cereals, corn meal, flours and rice, cil, will cost approximately \$3,000, where the most beneficial substance is found close to the outer hull of the product, and is lost through overbleaching, bolting and polishing.

### Waukegan Plans Addition to Its Present Sea Wall

Specifications were presented to the Waukegan city council at a meeting last week covering a proposed three foot addition to the present sea wall along the north beach in front of the city filtration plant, the Johnson Motor company and the Baehr Coke plant. The installation of the improvement, if approved by the coun-

according to City Engineer Henry Bleck.

The act of the council in bringing about a move to raise the height of the sea wall comes as a result of the high water in the lake which has been damaging property along the beach to a great extent during the past two years. The sudden rise of the lake this spring has made it absolutely necessary to take some steps to keep be completed as soon as possible. the water back.

The Johnson Motor company and the Baehr Coke company recently completed additions to the height of the sea wall at a cost of \$7,000. This wall will be added to be the city if the council approves the specifications presented.

City Engineer Bleck states that the improvement of the sea wall is im-

perative if the industries along the lake front are to be properly protected from high water. The roadway running along the lake front to the city filtration plant will never be of use during rough weather unless the sea wall is raised, he stated.

In all probability the council will advertise for bids on the specifications at once so that the addition may
