**ONE DEAD, MANY HURT
IN AUTO ACCIDENTS**

(Continued from Page 2)

Lencioni at the Highland Park hos-
pital, is progressing satisfactorily,
attendants there report.

The car which struck them was
driven by two boys. They were pick-
ed up by motorists to be taken to
Highland Park.

Woman Has Skull Fracture

Mrs. Eleanor Ford of North Chi-
cago was seriously injured in an ac-
cident at Lake Forest Sunday when
the automobile in which she was rid-
ing was struck by another car. Dr.
A. J. Rissinger of Lake Forest, who
attended her at the Alice Home hos-
pital, reported that she sustained a
skull fracture and a fractured verte-
brae. She was reported to be rest-
ing well at the hospital later.

Miss Senna Gottmer was reported
to have been in the accident with her.
Miss Gottmer suffered slight cuts and
bruises.

Three People Injured

Three people were injured Satur-
day night in an accident on the south
side of Highland Park when a car
driven by Antonita Sinkula from Ra-
cine collided with another car driv-
ing west on route 22.

Thomas J. and Antonita Sinkula
and their child, Arline, 14 years old,
were slightly cut. They were taken
to the Highland Park hospital and
had wounds dressed. They were re-
leased Sunday when it was found
they suffered no serious injuries. Dr.
Crossman attended the victims.

Arrest Follows Crash

Oscar Johnson, 6144 South Hoyne
avenue, Chicago, was arrested by Po-
liceman L. Cunningham of North
Chicago, when he was charged with
responsibility for a crash between his
car and a machine driven by Miss
Delphen Bettens of Lake Forest on
Green Bay road south of Five Points
Sunday.

Johnson, driving north, sought to
pass a car ahead of him when he
struck the Lake Forest machine. Miss
Bettens suffered a wrenched shoulder
and bruises. Her sister, Anna, and
a friend, Evelyn De Rue, were shaken
up.

Nab Drunken Drivers

Mrs. K. Richardson, 4726 North
Sawyer avenue, Chicago, had her car
badly damaged Sunday night when
she was hit by a car being driven by
Gus Orstadios who is employed in a
construction camp at Highland Park.
Gus was arrested for driving while
drunk and was held at the Highland
Park jail.

A sailor, Great Lakes license, no.
208, with a companion, were taken
to Alice Home hospital in Lake For-
est Sunday, morning, for treatment
of cuts and bruises, suffered when
their new Ford roadster turned tur-
tle with them at the corner between
Lake Bluff and Lake Forest. Neither
were seriously hurt.

Yet a jealous wife would be just
as mad if she knew what her hus-
band's stenographer really thinks of
him.—San Francisco Chronicle.

for Dollar Day bargains Friday and
Saturday.

**MRS. MCGRAW DIES
RESULT OF WOUNDS**

(Continued from page 2)

the hour not determined at the time
of going to press.

Rumors that Mrs. McGraw and the
roomer, George Sullivan, were nar-
cotic addicts, was refuted by Mr. Mc-
Graw, who stated that his wife had
only used narcotics on her doctor's
orders; and that she had not re-
quired any for over a year. She has
been much under the care of a doctor
in the past few years. Mr. Sullivan,
stated Mr. McGraw, had been a
friend of his and of his wife's for
about 18 years. Recently he had
been ill, and for quite a while with-
out any steady job, and had been be-
friended by the McGraws.

Mrs. McGraw, a trained nurse be-
fore her marriage, was taken to New-
ton, about 15 miles from Danville,
this morning for burial in the lot
where her parents and other relatives
are buried. Danville was Mrs. Mc-
Graw's native town. During her
years as a nurse she worked for Dr.
Gary in Chicago and did much work
free among the poor people of the
city who could not afford the services
of a trained nurse. Mr. McGraw is a
motorman for the North Shore line
and has been working nights. They
have lived in Highland Park twelve
years.

**HIGHWOOD SEEKS
BETTER LIGHTING**

(Continued from Page 4)

oratory at Menlo Park, New Jersey,
where he had already invented many
things such as carbon telephone
transmitters, etc., undertook the task
of devising a general system for the
generation, distribution and utiliza-
tion of electricity for lighting and
power purposes.

The first marked accomplishment
in operative detail was a lamp with
a platinum wire burner of high re-
sistance, protected by a high vacuum
in an all-glass globe, and with the
leading-in wires sealed into the glass
by fusion. Such a lamp necessarily
had a small illuminating power com-
pared with that of the arc light,
which was the only electric light then
in commercial use. About a year
later, Mr. Edison discovered that if
a carbonized cotton thread were sub-
stituted as a burner for the platinum
wire of his earlier lamp, the slender
and apparently frail carbon was me-
chanically strong, and also durable
under the action of the electric cur-
rent. This improved conditions and
electric lighting has become the stand-
ard for illumination for the entire
civilized world.

Not a Rich Man's Product

It must be emphasized what an im-
portant part electricity plays in im-
proving, strengthening, and upbuild-
ing, and how indispensable it is in
the activity of any community.

Years ago, electricity was consid-
ered the luxury of the rich. Now
electric light is coming to be shed
on rich and poor alike.

Cleanliness, safety and comfort are
factors of benefit. The decreasing
cost of electricity also should be con-
sidered.
