

IMPORTANT FACTS—

No sound

No moving parts

No oiling

No trouble

No wear

Costs less to operate

Will last indefinitely

These are only some of the advantages offered you in the

GAS REFRIGERATOR

A Tiny, Harmless Gas Flame gives you

ICE *Automatically* in a Gas Refrigerator

You know the size of the flame of your gas range pilot light. That's the size of the gas flame used in the *Gas Refrigerator*. Combined with a trickle of water and an absolutely safe refrigerant hermetically sealed — so it is impossible for it to escape — the tiny gas flame pro-

duces *constant, noiseless, healthful cold* without any attention. As simple and silent in operation as a thermometer. A *Gas Refrigerator* is as valuable in preserving foods as a gas range is in cooking them. Determine **NOW** to have a modern *Gas Refrigerator* in your home.

Small Down Payment—Easy Terms!

Our representative can tell you more about this unequalled method of refrigeration. Call us! No obligation to you. **ACT NOW!**
