SUPER-HIGHWAY IS SHOWING PROGRESS

Thursday, August 29, 1929

From Milwaukee to Michigan City Through Lake Co.; Much of Route Secured

A 200-foot right of way, from Milwaukee to Michigan City, through Lake county, which will be established for the purpose of enabling tourists to avert Chicago and Gary traffic has been worked upon all this year, and it was announced recently that approximately 68 per cent of the route has been dedicated.

The remainder of the road is expected to be cleaned up and prepared nation. for paving before the season opens next year, although in several counties the exact route is still undeter- American Automobile association at matter.

sin, Illinois and Indiana, taking a round-about route past Chicago. In East Chicago, and Gary.

Temporarily Outlined The route, as it has been temporar- faced throughout the country. ily outlined, leaves Milwaukee and goes south through Racine and Kenosha counties into Lake county. It passes almost directly south through Lake county, going west of Libertyville and east of Mundelein.

passes between Arlington Heights and Mount Prospect. Thence the route continues south through Du-Page county, passing between Elmhurst and Villa park, between Hinsdale and Clarendon Hills.

At the south edge of DuPage county the road turns southeast, keeping out of Chicago, Hammond and Gary limits, paralleling the lake shore into Michigan City.

The right of way for the "superhighway" will be 200 feet in width, inorder to accommodate the large amount of traffic which is expected to use it. Much of the pavement which is planned, including that in Wisconsin, is expected to consist of two 20foot slabs, with a 20-foot open space between them, permitting two separate lanes of traffic.

Route in Racine

From Milwaukee to the Racine county line, a distance of about 11 miles, the right of way has been 100 per cent secured. Through Racine county, the right of way has been located, and work will be started soon on clearing it.

In Kenosha county, no steps have been made to locate the route, because of the indecision of Lake county authorities regarding the point at which the route will enter Wisconsin.

Made Good Headway South of Mundelein about 85 per cent of the way has been chosen through Lake county and 85 per cent of the right of way in DuPage county has been dedicated. In Cook county, where the road jogs southeast around the end of the lake, about 25 per cent of the right of way has been dedicated. .

Lake and Porter counties, Indiana, also have secured about 85 per cent of their right of way and LaPorte county has 80 per cent of its way clear.

The right of way includes portions

of U. S. Route 41, Illinois Nos. 68 Up to the present time, the Federal and 54, a portion of the Lake county, government has invested about fifty within the next eighteen months at ernment collected millions of dollars least half of it will be paved, engin- in the form of an excise tax on motor eers agree.

170 AUTOS SOLD FOR EVERY MILE OF ROAD

There were approximately 170 new motor vehicles registered in 1928 for every mile of highway constructed on the Federal-Aid system of important interestate highways and 33 for every mile of road surfaced throughout the

This statement was issued today by National Headquarters of the mined, pending state action on the Washington, D. C., which has petitioned Congress for an increase in The highway has its source in Mil- annual appropriation for Federal-Aid waukee, and projects through Wiscon- from the present amount of \$75,000,-000 to \$125,000,000.

The estimate of the national motorthis manner, motorists will be able ing body is based on an increase in to bypass the heavy metropolitan motor vehicle registrations of 1,359,traffic in Chicago, Indiana Harbor, 883 in 1928, with approximately 8,000 miles of highway built on the Federal-Aid system and 36,000 miles sur-

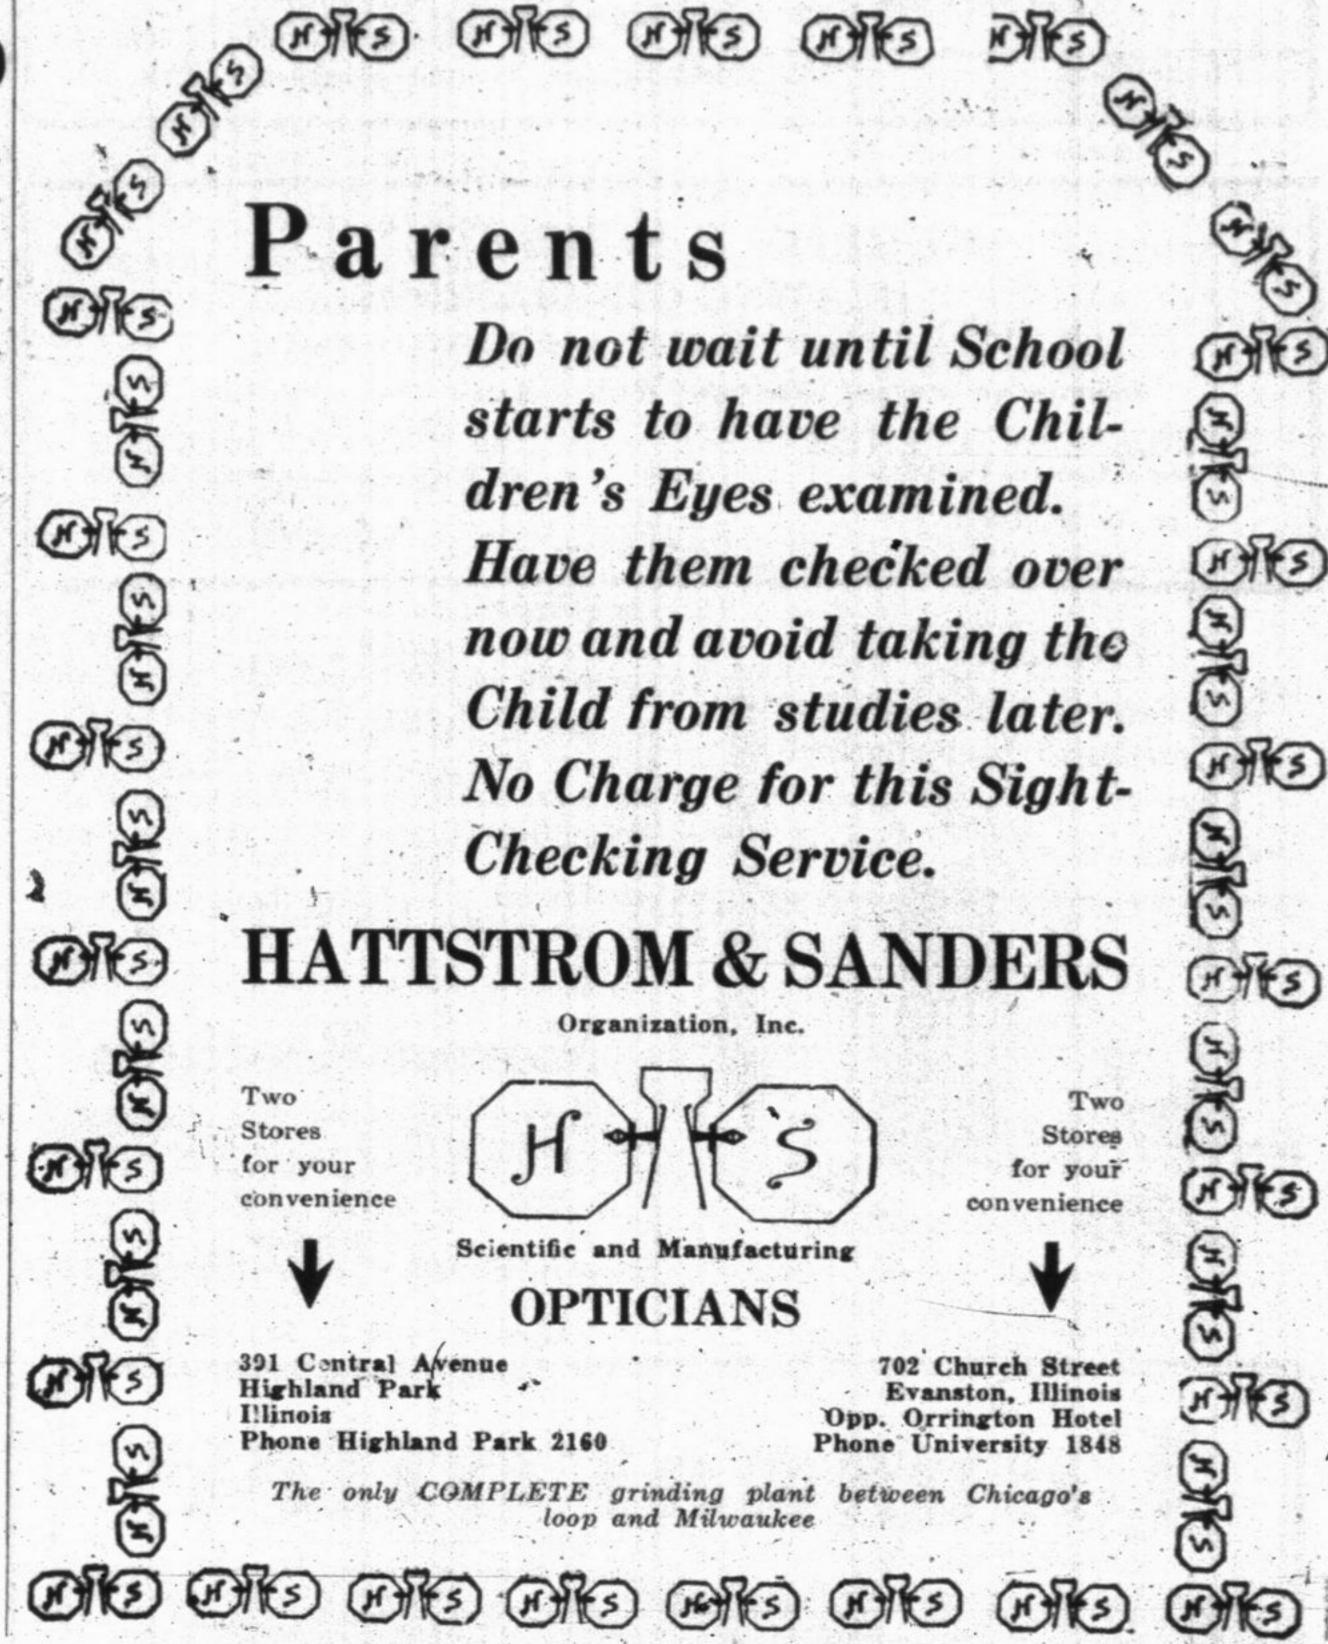

"The fact that road-building agencies are unable to keep apace with the gain in motor vehicle registrations offers an unanswerable argument for speeding up the construction declared. Thes. P. of highways," declared Thos. P. It then enters Cook county and Henry, present of the national motoring body, "and deserves the immediate attention of the legislative branch of the government.

> "While it is true that the government's participation in highway building through the medium of Federal-Aid has given a great impetus to the construction of roads, it is nevertheless also true that Uncle Sam has not borne a fair share of the cost.

Indiana road projects and part of cents per year for every man, woman U. S. 20 in Indiana. Consequently and child. In the meantime, the govvehicles which far overshadows the amount of money expended."

Federal Aid Small

The A. A. A. president asserted that in 1928 the nation's road building bill was \$1,500,000,000, of which the government contributed only \$75,-000,000 despite the advantage occuring to federal agencies, aside from those to the public.

Emergency Cases

Last year the Highland Park Hospital handled 407 major and minor emergency cases. It is not pleasant to think of emergencies but it is wise to do so and comforting to know that every facility for their treatment is provided at
