**NEW CABLE LAID TO
EUROPE IS SUCCESS**

The newest trans-Atlantic cable, which was laid last fall by the Western Union Telegraph company, has been successfully "duplexed" and has the greatest letter capacity per minute of any cable in the world, the Western Union announced yesterday.

The new cable, which was laid between Bay Roberts, Newfoundland and Horta, Azores, will connect at the latter point with cables to Germany and southern Europe. The tests just completed resulted in a speed of 1400 letters per minute in each direction over the cable. The fastest cable previously laid was designed to transmit but 2400 letters per minute in one direction only. The new Newfoundland-Azores cable has a speed approximately four times as great as the fastest duplex cable previously laid.

Beyond Expectations

The results achieved with the new cable have been well beyond expectations and prove conclusively the feasibility of duplexing high speed cables. Aside from the speed of this modern cable, the fact that it is "duplexed," i. e., can send messages simultaneously in each direction, offers many advantages because of its convenience in the handling of traffic.

The tremendous speed and the enlarged capacity of the cable are due to the use of numetal, a highly magnetic alloy similar to permalloy, in the construction of the cable; to a new electrical principle known as "tapered loading" and to newly developed operating equipment. In order to duplex the cable, it has been necessary to construct an artificial line located in each terminal station, which matches the electrical characteristics of the cable itself within an accuracy of one part in twenty thousand.

Cable experts of the Telegraph company pointed out that future ocean cables will undoubtedly have even greater capacity and efficiency as neither the limit of size nor of efficiency has yet been reached.

**Exonerate Driver in
Death of Small Boy**

A coroner's jury after hearing the testimony as to the manner in which Morris Nieuwenhage, eight year old son of Mr. and Mrs. Raymond Nieuwenhage, Lake Forest, met his death last week returned a verdict last night in which it absolved the driver of the auto from all blame in the accident. It was the opinion of the jury that the boy drove his bicycle in front of the machine driven by A. H. Holzer of 3108 Logan boulevard, Chicago, and that the autoist did not have time to stop his machine. The boy suffered a fracture of the skull when his head struck one of the headlights on the car. He died a short time after the accident in the Alice Home hospital. The accident occurred at the junction of Waukegan and Everett roads.

Those Model T Fords seem to be as slow in dying out as a rich uncle. Any married woman can tell you that the biggest babies are married men over 30 years of age. — Milan Standard.
