

Rummage Sale Is Planned for Oct. 18

The season of fall rummage sales will soon begin.

To Deerfield a rummage sale is an innovation. Those who are unfamiliar with the demand for clothing, furniture, clocks, dishes, bric a brac, trunks, suitcases, bedding, lingerie, old stockings, pictures, etc., at these bargain centers, will be interested in seeing the crowd of people who frequent the sales, and buy in large quantities.

The old black walnut furniture of early, mid, or late Victorian periods which has been stored in many an attic when the "bright cheerful" golden oak replaced it, and those who are tired of dusting the stored articles at house cleaning times, may be glad to donate it to the Parent-Teacher association, for there are a number of people in the vicinity who have bought old houses and are collecting period furniture for them.

To those to whom oak furniture has become antique, and have replaced it with mahogany, there are many foreigners who seek this style, and there are others who buy it to lacquer it.

The old pictures of which you are tired may gladden the home of some one else.

The torn silk stockings are eagerly bought by those who are making hooked rugs.

Children's clothing, shoes of all kinds, men's work clothes and bedding are in great demand.

The Marseilles or honeycomb bedspreads that you laid aside when you bought searsucker or rayon ones, will be sold to boarding house keepers.

The "white elephant" wedding presents, birthday anniversary gifts and other remembrances, which you have disliked and never used will find eager purchasers.

Children swarm around the toy section looking for things which they have not, and which they can buy for a few cents.

Books are sold in abundance. When doing your fall house cleaning save articles for the Deerfield Parent-Teacher association rummage sale, which will be held October 18 and 19, at store on corner of Deerfield and Waukegan roads.

Hold Girl Communists for Invasion of Fort

Two young girl members of the Young Communists league were held to the grand jury Saturday by U. S. Commissioner Edwin K. Walker on charges of entering a government reservation for unlawful purposes. The girls, Sandy Willman 18, and Ann Leggett, 19, both having Waukegan addresses, were arrested at Fort Sheridan two weeks ago while distributing communist literature among the soldiers.

Your Residence with All Its Cares

and responsibilities can be traded in now for a modern apartment in a distinctive 18 story fire-proof building with perfect panoramic view of Lincoln Park and the lake; close to the city yet removed from its bustle and noise. Highly restricted tenancy. It will pay you to investigate. For particulars, address Owner, 1410 Tribune Tower, telephone Superior 2372.

Better Tubes Result in Improved Radio Reception Is Claim

The high quality of radio programs during the past summer has been one of the most substantial factors in placing radio popularity on a year-round basis, declares M. F. Burns, radio tube expert.

"Radio sets are now capable of the same high degree of reception performance during summer as in winter and broadcasting stations are showing they are aware of this by continuing their best features upon a 12 month basis. Program sponsors also have noted this fact and a survey shows that the number of the sponsors was practically as high during the past summer months as during the cold months," he stated.

Public Response

"Definite proof of the modern day set to overcome the former handicaps of summer broadcasting has been carried directly to broadcasting sources by public response," he advises. Progressive stations that were the first to boldly continue offering the best of artists and the finest program that could be produced without abatement received enthusiastic approval from the listening public, it is reported to Mr. Burns.

"Program sponsors know that by maintaining the high standard of programs during the past summer, it has created an unusual stability in the listening public."

Manufacturers accustomed to a seasonable let-down during this period assert that the success of radio broadcasting has, in many instances, accelerated and stimulated sales volume to a new high record."

Increased Efficiency

It is the increased efficiency of the present day radio tube that has placed set reception on a par with the quality of broadcasting transmission, Mr. Burns declares. It is through the radio tube that greater selectivity and more accurate tonal qualities have been achieved, he believes.

"Any former claims that reception could not interpret the quality of the transmitted program has been thoroughly discounted by the 1929 types of radio tubes and sets," he states.

New Christian Science Church, Glencoe, Opened

First Church of Christ, Scientist, of Glencoe held its dedicatory services Sunday, September 15, at 11 and 3:30 o'clock in the new church edifice. Occupying a prominent corner on Greenleaf avenue and Beach road, this structure probably is not excelled in its simplicity of beauty and harmony by any other church building in the vicinity of Chicago. The church covers an area of 60 by 124 feet, and is in early American design, with the purest details. The entire exterior is of Colonial brick with white marble trim and slate roof. Leon E. Stanhope was the architect.

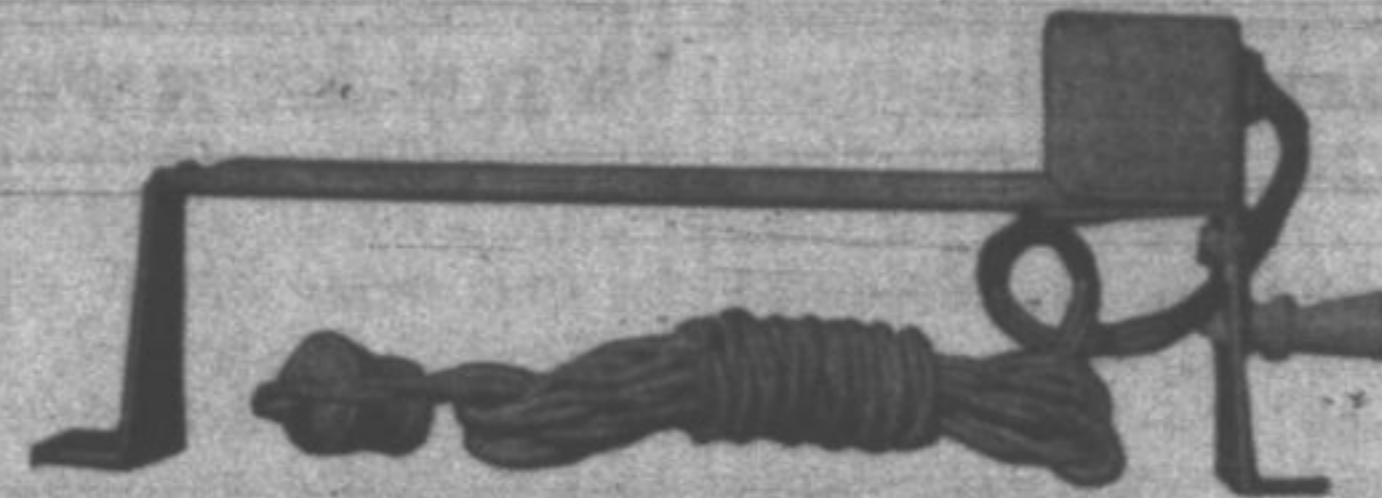

Very few people understand the tariff question, but a great many are willing to explain it thoroughly.

President Hoover's fishing camp is closed for the season, so any of the folks of this city who have been expecting an invitation to spend a week-end with him there, will probably have to wait until next summer.

ANDELCO Electric Auto Heaters

(ANDELCO - G. E. STRIP HEATERS)

Quality Equipment - Reasonably Priced

The 350 Watt Heater will take care of all other cars except twin sixes and the larger trucks, and the 500 Watt Heaters will take care of them.

ZERO WEATHER
