Brims Hold the Secret of the
Chic of New Winter Hats

There is an almost endless variety of clever new ways in which brims may be manipulated to create smart new effects in these new winter hats. The off-the-face line is almost general, but this season it is obtained by brims that sweep back brow to hug the crown of the hat and flare to a wide line at the side. Here are such models in, brown, beige, green and red.
