A SUBSTITUTE for the SUN

*with the same
health giving rays*

FALL and winter are seasons when many diseases are prevalent. This is because the sun's rays are not as strong as they are in the summer. But *now* you can have a substitute for the sun, for it has been definitely established that a Radiant Gas Room Heater sends out rays similar to those from the sun. You can enjoy the beneficial rays from the gas room heater conveniently and at small cost. The heater is clean and odorless. No fuel to bother with. No ashes to carry out after using it. Ideal heat for frosty fall days and evenings. Come in *now* and see the many sizes and designs you can choose from.
