

The Final Touch in the Furnishing of Your Home

NO matter how useful and necessary, your radiators are out of harmony with rugs, walls, furniture and pictures. The dry heat carries upward an invisible stream of dust, soiling walls, ceilings and draperies in a brief time. Dry heat induces colds and pulmonary troubles.

These conditions are all rectified when you install **TRICO Radiator Furniture**.

The concealed reservoir charges the atmosphere with health-helping moisture; soiling is prevented, and in place of the bare radiator [useless for many months] there is a cozy window seat or console table that can be used like any other fine piece of furniture. **TRICO** is all metal, made to fit, and to match any room color scheme.

If you have a fine home, you will be interested in **TRICO**.
