Garbage Can
(The Old Way)

*make garbage
and refuse disposal
in YOUR HOME safe
and easy with a*

GAS INCINERATOR

Every home that has a GAS INCINERATOR is protected against the hazards of the disease breeding garbage can and the dangers from accumulations of rubbish. Doctors state that many diseases originate in the garbage can. Fire chiefs the country over declare that 50 per cent of all fires start in rubbish piles. With this evidence showing the need for protection against the dangers of the garbage can and rubbish pile, it is apparent a GAS INCINERATOR—that burns all refuse *safely, quickly and economically*—is a necessity if you are to have sanitary, safe, modern refuse disposal in your home. Come in NOW and see our display of gas incinerators—or telephone and we'll be glad to send a representative to give you further information.

Gas Incinerator
(The New Way)

EASY TO OWN *because—*

- (1)—It is moderate in price.
- (2)—It may be purchased on a small down payment.
- (3)—You may take one year to pay balance.
