## AIRPLANE EXPORTS GAINING THIS YEAR

### Increasing Air-Mindedness Among People of World In- dicated, Says Article

Increasing air-mindedness of the world is definitely indicated by the fact that more than double the number of American-made airplanes were exported during the first half of this year than were exported in the first six months of 1928, according to a bulletin issued here by the Stinson Aircraft corporation.

"American airplane manufacturers shipped 199 planes to various parts of the world during the first six months of this year, as compared with eighty-seven for the same period last year," the bulletin points out. "There were 178 airplane engines exported as against sixty-five a year ago.

#### Commercial Necessity

"The world is learning that flying is not only a relatively simple process but a business and commercial necessity. Moreover, foreign nations are showing their faith in the performance and sturdy construction of American-made planes by giving them exclusive preference in its purchases. Flying instruction has become largely a matter of routine."

Total value of the airplanes exported for the six months' period, it is pointed out, was more than \$3,290,000, as compared to \$940,000 for the six months' period in 1928. Mexico was the largest buyer of planes from American manufacturers, taking a total of sixty-two. Canada bought forty-four; Chile, 32; Argentine and Hongkong, 11 each; Japan, 8; China, 4; Panama and Peru, 4 each; the Philippines, 3; and Italy and Cuba, two each. The Stinson factory has just completed shipment of four additional Stinson-Detroiters to the Chinese National government to be added to four already engaged in the recently established Chinese air-mail service.

The unit value of airplanes exported increased to \$16,500 from \$10,850 and for engines from \$3,700 to \$4,650, according to the Stinson figures.

## Feed the Birds Now; Weather Hard on Them

The days are hard ones for the birds. Snow has fallen almost continuously now for three days, and all food has been covered up. The continuation of the snow-fall, with severe weather taking toll of the weakened birds, will result in wholesale death among those feathered colonies which have elected to remain here for the winter, local bird lovers fear.

An appeal to housewives to put out extra food for the birds is being broadcast by admirers of the plucky little creatures, in an effort to save the lives of the thousands which are otherwise doomed to die.

#### Hear, Hear, San Diego

San Diego is where California began. It is a lovely city, made, undoubtedly, of sandstone and mortar; but it contrives, somehow, to look like silver and gold. — Woman's Home Companion.

## Scientists Declare Tin Cans Maligned; Are Not Poisonous

Tin cans as food containers have been acquitted of the charge of being poisonous by modern scientists.

"Although many housewives empty the contents of cans into dishes merely because the food looks better that way," says Woman's Home Companion, "scientific tests have proved that any difference as to safety between food left in an open can and food transferred to a dish for keeping, is in favor of the can.

"In the transfer, the food is exposed to the contamination of the air and handling and is taken from a sterile can and placed in an unsterilized dish. Spoilage is therefore likely to occur more rapidly in the dish than in the can.

"This is particularly true of a food so perishable as milk, and evaporated milk is better protected in its sterile container than in any household dish. With two small holes punched in the top of the can at opposite sides, from which to pour the milk that is needed, it will keep two or three times as long as ordinary milk under the same conditions."

## Libertyville Board Elects New Officers

State Representative Richard J. Lyons who was recently elected secretary of the Illinois Association of Real Estate boards at the Rockford convention, was re-elected president of the Libertyville-Mundelein board at the election of officers on December 16. The following other officers elected were: Wm. H. Hopkins, first vice president; John Rouse, second vice president; A. E. Suter, treasurer, and R. G. Kaping, secretary.

Mr. R. G. Kaping who has acted as secretary for the past three years was re-elected; his thorough efficiency and sincere efforts on behalf of the realtors have been very satisfactory, and his re-election does not come as a surprise.

Two new directors were also elected for three years, namely: Paul MacGuffin and Lloyd Ray, both of Libertyville.

The realtors look forward to great activity during 1930, and they are making plans for increasing business and laying out work for the great expansion and development program which is coming in this territory.

## Semester Examinations at H. S. to Begin Jan. 2

Final examinations for the first semester at Deerfield-Shields high school will begin Monday, January 20.

The examinations are one hour and a half long as usual, starting at 8:30 a. m., and lasting until 6:30 p. m.

On Monday, January 20, there will be tests in Spanish, commerce and arithmetic. On Tuesday the science history, Latin, mathematics, and French tests will be held, while on Wednesday the remainder of the English exams will be held.

One or more proctors will be in charge of each examination, depending on the number taking it, while the gym teachers will be on duty in the halls during the three days of the examinations.
