

Highland Park Presbyterian Church
Laurel and Linden avenues
Rev. Frank Fitt, minister
Church phones 683 or 46

Friday:
7:00 Boy Scout meeting in the Junior room of the parish house.

7:00 Camp Fire meeting in the camp fire room, 176 Laurel avenue.

Sunday:
9:00 Girls' choir rehearsal in the church.

9:15 Boys' choir rehearsal in the lecture room.

9:45 Church school.

11:00 Morning worship. The Sacrament of the Lord's Supper will be celebrated.

3:15 There will be a joint meeting of the session and the board of trustees in the parish house.

6:15 The Boys' Glee club rehearsal in the parish house.

6:45 Young People's society supper and election of officers. Miss Marjorie Kendall will have charge of the program. Something interesting is in store for you. Be sure to come.

Monday:
10:00 Dorcas society meeting in the parish house. Luncheon will be served at twelve o'clock. Join this group in work and fellowship.

7:45 The Community Leadership Training school for the churches in this section on the North Shore will open. The following courses will be offered: The Study of the Pupils with Dr. Coffman teaching it; Primary Materials and Methods with Miss Bertha Wheelock teaching it; Junior Materials and Methods with Dr. Marion O. Hawthorne teaching it; and Intermediate-Senior Materials and Methods with Miss Marion L. Norris teaching it. Parents as well as teachers are urged to attend.

Tuesday:
7:45 The Young Woman's club will meet in the parish house. The young women of the church are cordially invited to attend.

Wednesday:
7:00 Girls' choir rehearsal in the parish house.

7:45 Church night. Following the service of praise and prayer Dr. Rahl will lecture on "The Way of Trust." These services are very helpful.

The Swedish Methodist Church
Highwood avenue and Everets place
William W. Nelson, pastor

Thursday, Jan. 30:
8:00 p.m. Prayer group at church.

Saturday, Feb. 1:
2:00 p.m. Confirmation class hour.

Sunday, Feb. 2:
10:30 a.m. Sunday school.

6:00 p.m. Epworth league devotional meeting.

7:45 p.m. Evening service in English.

Monday, Feb. 3:
7:45 p.m. Opening night of the Teachers' Training school to be held at the Highland Park Presbyterian church.

Wednesday, Feb. 5:
8:15 p.m. Northern District Epworth League court at the Eline church, located at Barry and Os-good streets, Chicago.

HINTS FOR THE HOME

The Healthful Orange

Perhaps if you took a census of the fruit tastes of your friends you would find that the orange was given first choice in something like ninety per cent of the votes. Perhaps it would stand favorite at even better odds. Perhaps not. At any rate, the orange is almost universally liked.

Orange Puffs

Sift into mixing bowl one and one-fourth cups pastry flour, one-half cup of sugar; add one-half cup milk mixed with two egg yolks, one tablespoon grated orange rind. Beat two minutes, pour into six greased muffin tins and bake twenty-five minutes. Serve hot with orange puff sauce.

Steamed Orange Pudding

Make biscuit dough and roll it into a long narrow sheet one-fourth of an inch thick. Spread thickly with peeled and sliced oranges, sprinkle with sugar and grated orange peel and roll up, twisting the ends together. Lay it in a buttered pie tin or pudding dish placed in a steamer over boiling water. Steam for an hour and a half and serve with any sauce.

Orange Cake Filling

Bring to the boil two cups of water and the grated yellow rind of two oranges. Thicken with three tablespoons of cornstarch rubbed smooth in half a cup of cold water, and cook, stirring constantly. Take from the fire and add a cup of powdered sugar beaten with the yolks of three eggs. Stir until nearly cool, then add a tablespoon of butter, the juice of four oranges and one lemon, and cool. Spread between the layers and cover with orange icing.

College to Give Girls Degrees in Courses on Management of Hotels

Bachelor of Science degrees will be awarded to women graduates completing specialization in hotel work at Cornell university hereafter.

This increasing need for women in hotel work, according to Woman's Home Companion, is being brought about by the constantly growing personal service at the better hostels. Playrooms are maintained for children, chaperones furnished for girl guests, calls paid to guests who fall ill away from home, thorough library facilities are maintained and hostesses are furnished for social functions.

The job of housekeeper in a big hotel, says the magazine, is one that is drawing more and more attention from college women. Instead of being a menial position, the job of housekeeper requires true executive ability besides a host of other qualifications. The housekeeper is responsible for not only the private but public rooms of the hotel and has the entire staff of chambermaids, bath maids, seamstresses, inspectors, house men, upholstery men and others under her direction. The magnitude of a housekeeper's job may be better realized from the fact that 25,000 dozen towels, alone, are required to open a large city hotel.

WOMEN HOLDING 41 PER CENT WEALTH

Report of U. S. Financial Institutions Show This True; Gaining More

Reports of big financial institutions as 1929 drew to a close showed that 41 per cent of the country's wealth is in the hands of women and more of it is drifting toward them each year, according to Woman's Home Companion.

Today 9,000,000 women share in the payrolls of the country. There is \$95,000,000,000 worth of insurance in effect in America and 80 per cent of it is payable to women. One trust company estimates that 70 per cent of all the estates left by men pass into the hands of women.

In one year 44 women and 42 men paid taxes on incomes in excess of \$1,000,000. Women paying taxes on incomes in excess of \$100,000 had aggregate incomes of \$484,794,000. Men in this class had aggregate incomes of \$404,800,000.

Stock in some of the country's largest institutions is also passing into the hands of women. The United States Steel Corporation has 59,688 women stockholders, this being 37 per cent of all shareholders. The number increased 5,000 this year alone. The General Motors Corporation has 36,900 women shareholders as against 59,700 men. The Baltimore & Ohio Railroad has 15,826 women stockholders, 44 per cent of the total. In the Pennsylvania Railroad the women constitute the better half. There are 79,275 of them, a little more than 50 per cent of all the stockholders. It is in the American Telephone & Telegraph company that women have attained their greatest importance, for there they constitute 55 per cent of all shareholders. In this enterprise 250,000 women hold stock.

Things to Cook

A very satisfactory variation of the usual method of making succotash is scalloped corn and lima beans, using the golden bantam or other yellow corn and the small green lima beans.

When fresh vegetables are in season they may be substituted for the canned ones, if wished, using two cups of each.

Scalloped Corn and Lima Beans

- 1 can golden bantam corn
- 1 can small green lima beans
- 3 tablespoons butter
- 3 tablespoons flour
- 1 1/2 cups milk
- 1 teaspoon salt
- 1/2 teaspoon pepper.

Drain the beans, if canned, or cook the fresh ones. Make a sauce of the last five ingredients. Place half of the corn in a greased baking dish, then half of the beans, with some of the sauce over each, then the other half of each, with sauce between and over the top.

Sprinkle lightly with paprika and bake about one-half hour at 450. May be baked more slowly if oven is being used for other food at a lower temperature.

'Phone 15,000 Miles, Britain to Australia; Notable Achievement

When officials of the American Telephone and Telegraph company in New York City exchanged greetings with Australian telephone officials in Sydney recently, in a demonstration of the practicability of connecting the transatlantic telephone channel with one of the new short wave radio telephone channels between Great Britain and Australia, the voices of the speakers were carried a total distance of 15,000 miles.

From New York the messages passed over wire lines to the short wave transmitting center which is located at Lawrenceville, N. J. Thence they were sent by radio to the short wave receiving station of the British General Post Office at Baldock, near London, England, and thence by wire via London to the British Government's transmitting station at Rugby, England. Again radio served as the carrier to the receiving station of Amalgamated Wireless of Australia, near Sydney. The return path was again to Baldock from Australia, but on reaching Baldock the messages came via Rugby to the Bell System's short wave receiving station at Netcong, N. J.

The demonstrations were regarded as entirely satisfactory, and it is an interesting fact that while actually it requires only a fraction of a second to send such a message from New York to Australia over 15,000 miles by a short wave system of transmission interconnecting the wires of the United States and Australia, such a message may not reach its destination until the next day. This paradoxical statement is due to the fact that when it is four o'clock in New York City, the clocks in Sydney, Australia, read seven o'clock the next morning.

Vermont First State to Eliminate Street Cars, Says Magazine

The rapidity of America's march of progress has been demonstrated in Vermont, which has attained the honor of being the first state without street cars, according to Woman's Home Companion. The last of the conveyances was abolished a short time ago with elaborate ceremonies.

The last car on the remaining electric line was draped with crepe and, with a band on board playing Chopin's Marche Funebre, it was run slowly to the end of the line and burned. The tracks will now be removed and passengers served by buses. Lined up along the streets for the celebration were scores of men and women who recalled in newspaper interviews the gala occasion when the first street cars in the state ran over the route, hailed as a new miracle of transportation. Thus, within one generation, a revolutionary invention has come and gone.

"Lifetimes," says the magazine, "though too short, are long enough nowadays to open whole epochs in material progress, so swiftly does the world change its customs. We invent ingeniously, manufacture prodigiously and reject the old with a gay gesture. The rate of our growth is measured by the height of the junk pile."
