and cuter). Once the circles are accomplished it is but a step into the apparently complicated dance figures, —all of which are composed of segments of circles. Strokes should be started with a bended knee, and as the circle nears completion the body should be in a standing position. The balance foot (the one not on the ice) should always be pointed down and out. The balance leg, and the balance arm should be held in parallel lines. For beginners these simple directions will be of considerable help, and all skaters who would like to learn something of the waltz and other interesting steps, are cordially invited to drop down to the Ravinia rink. A remarkably friendly spirit prevails at the Ravinia rink, and folks have been amazed at the interest and at the number of adult skaters who have become interested in skating this year.

Season Not Ended

With the exception of the past few days when mild weather has prevailed, the ice has been of a fine glassy texture all season. At least six weeks more of fine ice is looked forward to by Ravinia skaters. Don't wait to buy skates if you haven't any, get them now. Outdoor exercise is of paramount importance in the maintenance of health. You can beat the usual winter epidemic of colds if you skate, and you will have more fun than you can imagine.
