Plans to Open Fruit and Vegetable Market

Tony Lencioni, proprietor of the local bowling alleys and formerly in the confectionery business plans to open a vegetable and fruit market in his building on Central avenue, just west of Second street about the end of this week. He is stocking the new store with everything in the line of fresh fruit and vegetables of all kinds and those who know him are assured that he will give prompt and efficient service and that the goods he sells will be first-class in every respect.

IMPORTANT WATER NOTICE

The City's new filter plant has been in operation since April 16th, and only clear water is being pumped into the distribution system. However, the old water mains hold large deposits of mud, and the public is warned that from time to time this mud is likely to show at the taps. This is usually caused by an excessive use of water, necessary opening of hydrants, or cutting in of mains. Upon the final completion of the new water plant, some weeks hence, when the necessary surplus water will be available the mains will be given a thorough flushing. Until this has been done the public is asked to be patient and to remember that any muddy water coming from the taps is the result of the deposits in the mains, and does not come from the filter plant.
