free wheeling is here!

**You don't have to
touch the clutch,**

*except to start
or back up!*

Free Wheeling—the greatest of Studebaker's many impressive contributions to the industry's progress! Studebaker is the first American car to offer free wheeling.

Like many marvelous engineering advances, free wheeling is simplicity itself. Imagine a car in which you don't have to touch the clutch, except to start or back up!

Think of being able to shift from high to second at forty . . . fifty miles per hour, and never touch the clutch!

Consider the satisfaction of enjoying these motoring marvels in a seasoned champion Eight, with a saving of 12 per cent on gas, 20 per cent on oil—even more

in heavy traffic! Consider, too, the economy of less carbon, less strain and wear on engine, transmission and all driving units!

You literally glide along. Your car momentum never forces your engine—there is no sensation of "piling up" when you decelerate.

Your car is surprisingly quiet in every speed . . . uncannily silent when you're free wheeling.

Almost incredible as these statements may seem to you, a drive in the New Series Studebaker President or Commander Eight will prove them to you. We promise you the thrill of your life.
