

## July Established New Heat Record in County; Comparative Figures

The month of July established new records for Lake county with the hottest day on record the coldest July day on record, and the warmest average temperature on record, the report of John Laux, official government observer, at Waukegan, shows.

The coldest July day was July 15, when the temperature sank to 41 degrees. The record for the hottest day on record in Waukegan, however, was broken four times during the month. On July 12 the temperature was 99 degrees.

Then in rapid succession three days set three newer records, July 13 set the record at 100 degrees, July 19 at 101 degrees, and July 20 finally reached the peak at 102 degrees.

July's mean was 73 degrees. It was also the second driest month on record, July of last year being a fraction of an inch lower in amount of precipitation.

The official report of observer Laux is as follows:

July 1930—Maximum temperature, 101 degrees; Minimum temperature, 41 degrees; Mean temperature, 73 degrees; Clear days, 21; Partly Cloudy, 3 days; Cloudy, 7 days; Rain, 2.42 inches; Prevailing winds, S. W.

July 1929—Maximum temperature, 94 degrees; Minimum temperature, 47 degrees; Mean temperature, 72.1 degrees; Clear days, 16; Partly cloudy, 10 days; Cloudy, 5 days; Rain, 1.22 inches; Prevailing winds, S. E.

## Highland Park Girl Joins Trail Riders

Among many American visitors to Banff and Lake Louise this season was Miss Alice Gradle of Highland Park who joined the Trail Riders of the Canadian Rockies on their annual ride over new mountain trails. A new trail is being cut between Banff and Lake Louise in preparation for the 1931 ride next August, through extremely scenic districts.

## Former Waukegan Man Invents New Device

George K. Spoor, for years a resident of Waukegan and now one of the leading motion picture producers in the United States, has announced the completion of an invention on which he has worked for 14 years, which is expected to revolutionize the movie industry. Reports that the experiments have been in progress have been current for the past year.

Mr. Spoor, assisted by his brothers, Walter and Clinton of Waukegan, and Major and Bob of Chicago, has had his experimental laboratories in Chicago since dropping out of the old Essanay Film company several years ago. The new invention was perfected there and has been taken out to Hollywood, California, where the first public exhibition will be made on September 15.

### Features Natural Vision

The feature of the film making process is the portrayal of the scenes exactly as they would be seen by natural vision, with exactly the same perspective, at the same time recording sounds. Colors are to be added.

George Spoor commenced his motion picture career in Waukegan in the early days of the motion picture. He associated himself as a young man with Mr. Amet, Waukegan inventor of picture filming, and was the first man to show moving pictures in the old Waukegan Opera House.

## Holder Commutation Ticket Record for 240 Months on N. W.

Possessor of the first commutation ticket of the month for 240 months—that was the record of William C. Shurtleff, Wilmette, during his period of commuting between the north shore village and the loop.

His collection of ticket stubs, just turned over to C. A. Cairns, passenger traffic manager of the road, each bear the number "0" and reveal that Mr. Shurtleff followed a constant hobby of being the first person to buy a 60-ride ticket each month at the Wilmette station.

A study of the tickets show that three different general passenger agents served the North Western during his commuting days and a change was made in the trade mark from "The North Western Line" to "Chicago & North Western Line."

During the first fifteen years of the collection the body of the tickets were of many colors, green predominating, but during the last five years the colored part of the tickets was reserved to the ride number, the stub being a solid white.

The tickets will be kept in the Chicago — North Western's permanent historical file.
