What a lot of your clothes need reviving and re-freshing! Some perhaps, you'll not be needing again this year—but why put them away soiled and allow stains and perspiration marks to become deep-set?

And very soon you'll be into the change of seasons, that spells a change in apparel!

That's why next month is a very busy month — a peak season — with all dry-cleaning plants.

Why not send your vacation wardrobe and your fall apparel together—today—and be sure of getting the best attention and care! We'll hold the work for later delivery, if you wish.
