This New Double Vision Lens

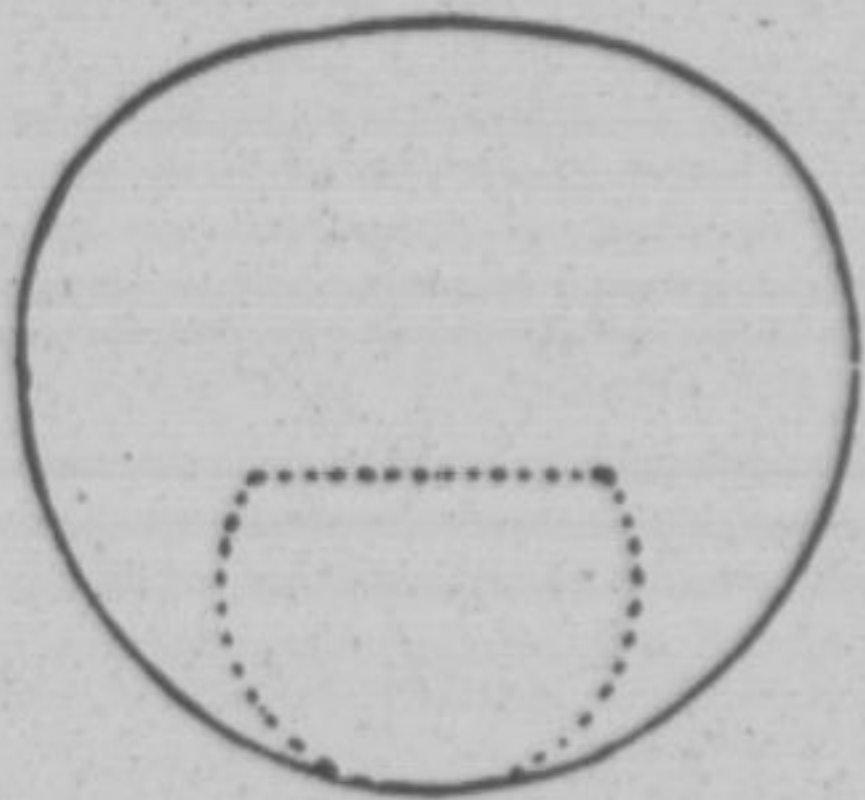

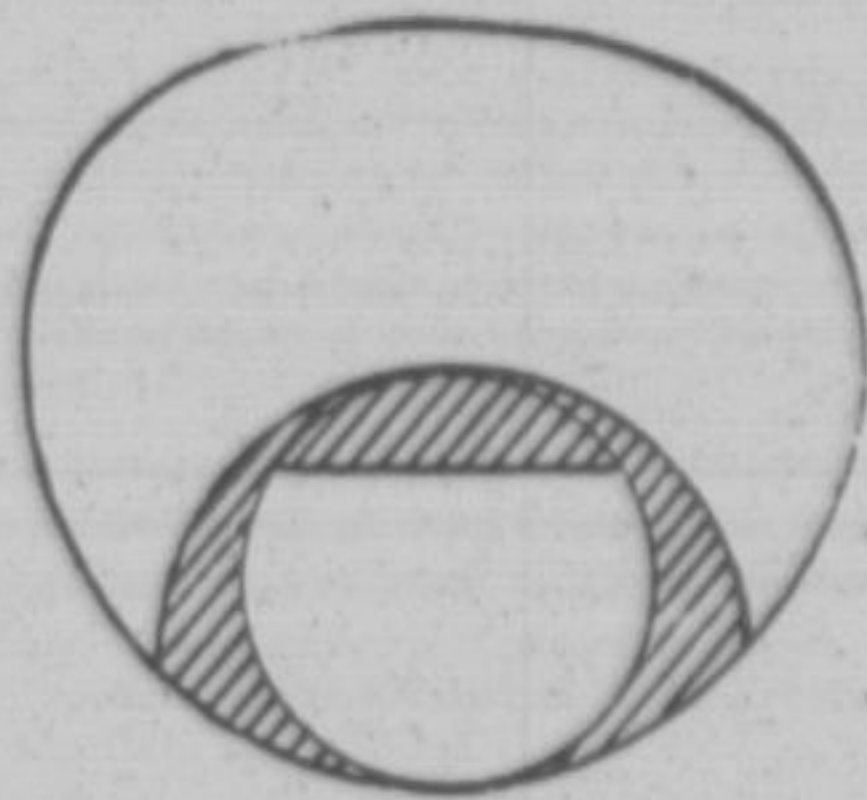

Brings Better Vision,

Sure Comfort,

Greater Safety

TO WEARERS OF BIFOCALS

◀ **Note the Great Improvement** ▶

The new reading segment is indicated by the dotted line. This shape of reading field provides a wider lateral field and a much more useful vertical field than is obtainable with other bifocals.

This sketch is shaded to show the blind area and useless parts of the old-type Kryptok bifocals. In Univis that space is added to the distance field.

THE segments in this new "Univis" lens, of course, are of the invisible type (hardly noticeable). And Almer Coe & Company both recommend and guarantee "Univis" lenses. Stop in any Almer Coe store. See them, in whatever style of glasses you prefer—you will find them far superior to bifocals you have known.
