

FEDERAL BUILDING FOR H. P. PROSPECT

(Continued from page 6)

Highland Park should be passed early during the next session of Congress, Senator Otis Glenn of Illinois, a member of the Senate Appropriations committee, announced today in a resume of the status of federal building projects in Illinois following conferences last week with President Hoover and treasury and post office department officials.

Highland Park and 12 other Illinois cities with annual postal receipts above \$40,000 have been recommended by the joint Treasury and Post Office Department committee for new federal building projects. Senator Glenn pointed out that these may be provided out of a lump appropriation of \$115,000,000 which is already available.

Before Congress Next Month

"A report will be made to Congress at the December, 1930, session as to the allocation of that fund," Senator Glenn said, "and I believe this matter will receive early consideration."

"In view of the unemployment situation a vigorous effort will be made at this session to provide an enlargement of the \$115,000,000 fund for federal buildings. If this is done many more Illinois cities will benefit. As a member of the Post Office and Treasury Departments subcommittee of the Senate Appropriations committee, I shall energetically support such a move for added funds at this time."

With a view to slashing "red tape" that hold back big federal projects in Illinois and to help relieve the unemployment in his State, Senator Glenn conferred with President Hoover, Secretary of Commerce Lamont, Postmaster General Brown, Chief of Staff General Summerall and Assistant Secretary of the Treasury in charge of Public Building.

Systematic Program

"I find that a thorough and systematic program is under way by the Federal Government in its effort to relieve and reduce the unemployment situation," the Illinois Senator stated. "Federal Building and construction projects are being speeded up to the point that the amount of government money expended during this fiscal year, ending June 30, 1931, on these projects will aggregate more than three times the total of the moneys expended by the Federal Government during the last three fiscal years."

"For the State of Illinois, the Treasury reports that plans are being drawn for work to commence during this fiscal year on 14 buildings in 13 Illinois cities, at a cost of \$19,085,000. This is the Federal part of a program which necessarily, for most complete relief, must come largely from the states and municipalities themselves and from the organizations and citizens of the different states. And it is noteworthy here in Washington that Governor Emmerson has been one of the first and most energetic of the State Executives to realize this fact and act upon it."

Mr. and Mrs. John Farner entertained at two tables of cards on last Tuesday evening in compliment to Mr. and Mrs. Matrovie of West Lake Forest, who recently returned from a trip abroad.
