DEERFIELD HIGH IS BEATEN BY WAUKEGAN

(Continued from page 6)

The third quarter found Waukegan scoring their second and last touchdown of the afternoon. Christensen scored this touchdown when after a series of long runs he plunged over from the 6-yard line. Deerfield carried the ball deep into Waukegan territory in the last quarter but again failed to produce the punch needed to score.

Saturday the locals travel to Evanston to take on the league leaders in what should be an easy victory for the Vancemen. Last year Evanston was crushed 33 to 12 by the Blue and White. The Evanstonians boast an undefeated eleven and do not intend to have Deerfield mar their slate. The Freshman-Sophomore elevens from the two schools will meet in a curtain raiser.

Points Out Letter Landscape Work Being Done by Park Board

(Continued from page 5)

thirds of this matured stock has been planted on park sites and about the golf course. This stock will no doubt be replenished in the nursery for future use.

In addition to the planting from the nursery natural stock, secured from the park sites where the wild growth is undisturbed, has been used to good advantage.

The most extensive plantings this fall were at the new park west of Ravinia station, additional planting in Long View park along St. Johns avenue, and at the city hall. Considerable planting was done on the golf course.

Many seedlings found in the parks are transplanted in the nursery at the golf course where they are cared for until they mature sufficiently to be planted in permanent locations.

One of the unusual attempts of suburban beautification was the improvement of the right-of-way of the Chicago, North Shore and Milwaukee railroad along St. Johns avenue by grading, planting and seeding. This work was done by the Park board employees under the direction of the superintendent and the funds for such work was provided by the city, the Electric road, and the Park board.

Mr. Milton Hardacre, who is the park commissioner from the Ravinia section, was most active in bringing about an agreement among the parties who provided the funds.

This example of civic beautification has been commended on by persons interested in civic work of this class.

There is at present a movement on the part of the city council to plant or landscape the parkways of the city. This policy is commendable provided due precaution is taken to safeguard the lives of pedestrians and autoists.

There are examples of planting in parkways that might be called criminal when the safety of the public is considered. Some owners of property, particularly where sidewalks do not exist along the street, have planted shrubs at or near the curb often obscuring the autoist's vision of driveways and walk entrances to their property and the approach to intersecting streets.

The protection of lives certainly should receive first consideration by those charged with the safety of the public.

The pruning or trimming of trees and surgery work, as well as fertilizing, has also received the attention of the Park board.

The dead branches are removed each year as far as possible and during the past year considerable surgery has been done. The results of the fertilizing, where done, has met with gratifying results.

The East Park board owns or controls more than two hundred seventy-five acres of land, considerable of it being wooded. It is an easy matter to plan how to make things beautiful but quite another matter to find the funds to pay the cost of such work and to take a step to farther every improvement of this kind means added cost of upkeep. Find the money first is the slogan that must be followed. Edw. M. Laing.

Deerfield Locals
