Thrift and Economy

by Marshall Pottenger

Thrift is not how many dollars you save, but how much you can buy and save from dollars spent.

A dollar is worthless unless you can spend it.

It is the number of times it is spent in our home community, that keeps everyone happy and realize the pleasures gathered from its many transactions.

Our ambition determines to a great extent the use we have for a dollar.

When our ambitions become inactive the dollar slows down, purchases are small, dollars are also inactive.

Raise your ambitions. Improve standards. Make greater ambitions and the whole world will follow.

Keep our home dollar moving. Everyone in our village do something to improve our natural assets.

Thrift is really how much we possess in natural assets, and not altogether how much gold you have in your sock.

Economy and Thrift

Economy and thrift are achieved by equality in distribution of funds. In order for our fellow neighbors to all enjoy thrift we must help distribute our funds so that all are kept busy.

Thrift and economy cannot be a companion to idleness.

A job for everybody and everybody kept busy is something though it seems ever so unimportant.

About the worst thing a man can do is to give up. Keep going. Do something, your reward will come sooner or later.

Neatness, cleanliness and healthfulness are your greatest assets. Improve them if possible.

A person seeking a job is at once scrutinized and judged by his appearance.

When loafing on the street corner or in the pool hall your appearance is continually being observed and judged. There are always certain ones who get the first chance at a job.

Our standard of living is what puts our U. S. A. and our village on the map, as a class of people unexcelled by any nation, or village.

Let's improve it. Education is one thing we can improve and build assets for future use.

Improve your accomplishments. Get the right start.

Stick to a certain line of work and become efficient in it.
