

A VOICE OF THANKSGIVING

Deep in our hearts we are thankful for the patronage we have enjoyed in the past.

Our patrons have increased with the passing of the years. They come to us for the service we can render. We delight in giving it and we are truly thankful that our facilities are such that we can and do give them the very best.

WHERE CRANBERRIES ARE IMPORTANT CROP

Most of Them Come from Massachusetts; Some are Picked by Machines

Most of us know where our Thanksgiving and Christmas turkey is coming from, but few of those who know where the turkey's chief aide-de-camp, the cranberry, from which the ever-present cranberry-sauce as made, is cultivated, says an N. E. A. story from Boston.

Massachusetts probably produces more cranberries than any other state in the union—there being only five out of the 48 in which the berries are grown. The other states are New Jersey, Wisconsin, Oregon and Washington. Consequently while there may be a surplus of wheat, corn, potatoes and other farm crops, there is never a surplus of these berries. In fact, the supply is never enough to meet the demand.

For a time the industry got along as best it could using old-fashioned methods of cultivation. But recently modern mechanical practices have been utilized, and now a number of machines have been developed not only to sort and grade the berries, but to pick them as well.

Canned Cranberries Now

The berries are no longer sold altogether for consumption in their natural state. They are now canned and jellied, and shipped all over the world. Through canning, they are made available all the year round.

The bulk of cranberry picking is still done by hand, with the aid of wooden "scoops," or rakes with curved teeth. A skilled hand picker, paid by the box, can earn about \$15 a day.

Introduction of a mechanical picker has greatly aided the industry. It is operated by gasoline and set with rows of curved teeth on a revolving cylinder. It can do the work of 10 men with scoops. It picks a bushel of cranberries in 45 seconds and covers from two and a half to three acres a day.

No Danger to Vines

The machine does no damage to growing vines, due to the fact that its scoops work backward instead of forward. The pickers on the drum are in rows of 40, and as the drum revolves they move slowly through the vines, pull off the cranberries and carry them to the top of the drum. There they drop into a hopper and are conveyed to boxes on the outside of the machine. Helpers follow the machine and remove the boxes as fast as they are filled.

The machine is simple to operate. It runs on three rubber-tired wheels, is run by gasoline and can easily be handled by one operator.

The way the Russians are now dumping all sorts of commodities on the world market would lead us to believe that what Henry Ford has really sold them was not tractors but dump cars.

South Glencoe Group Organizes for Civic Improvement Benefit

Organization and incorporation of the South Glencoe Improvement association is announced.

The primary object of the new group is to serve South Glencoe, the most thickly populated part of the village. The association will cooperate with the village officials.

Directors of the association are Walter L. Backer, R. N. Boehmer, Frederick A. Cooper, Robert L. Holland, George L. Hildegendorf, W. Albert Kemp, L. B. Krumsick, L. Duncan Lloyd, E. C. Schuett, George E. Schumacker, William E. Seaberg, Jules Urbain, Walter R. Werner, Willard L. Wheeler, G. L. Zick.

Jules Urban is president, George H. Hilgendorf, vice president; William G. Seaberg, secretary, and E. C. Schuett, treasurer.

L. Duncan Lloyd is chairman of the traffic regulations committee, George E. Schumaker of the parks, playgrounds and schools committee, R. N. Boehmer is chairman of public relations and improvements, and W. Albert Kemp in charge of publicity and membership.

Plan Organization of N. S. Municipal League

Definite organization of a North Shore Municipalities Association, an inter-community body comprising representatives of 15 shore-line towns, will be effected at a general meeting scheduled for December 5 at Highland Park, it is announced. Plans for such a meeting were proposed at a Chicago meeting of committeemen recently appointed by Major L. J. Yager of Waukegan.

At another meeting of this committee scheduled for next week, preliminary papers outlining a tentative plan for the inter-community group will be presented.

The committee, at first suggested as a means of properly carrying out the gas rate fight, has since been recognized as a valuable asset for all communities of the north shore in discussing problems of common interest. A similar organization was operating several years ago but was forced to break up during the World war.

Head of National Office Supply Co. Plans to Take Rest

Arthur Stevenson, for twenty-four years associated with the National Office Supply company, Waukegan, as president and treasurer, is to resign and retire from active work with the company at the end of the year, it was announced recently. Mr. Stevenson joined the Nosco, as the concern is familiarly known, in 1907 as secretary, and took over the position of general manager in 1908.

The National Office Supply company was located in Zion from 1906 to 1925, when they came to Waukegan, building their own plant in South Genesee street. The company has more than sixty employes and has enjoyed a steady, consistent growth.
