

A Vital Question!

A duty which a civilized people owe to civilization is to make proper disposition of its waste.

The increase in your taxes for this much needed improvements is very slight. The bonds will be spread over twenty years. During the first four years no bonds will be retired. If you pay \$50.00 taxes at present the increase in your taxes during the first four years will be only sixty-four cents (64c).

On Bond Issue To Build New Sewage Disposal Plants

Election Saturday, Dec. 20, 1930

Your Support Is Needed!

Every Day

Seven Million gallons of untreated sewage from about 34,000 people—about one-half the population of the district—is discharged into the lake every 24 hours, carrying over 3 tons of suspended solids each day, and containing millions of harmful bacteria of intestinal origin.

at Ravinia and Highland Park

The Cary Avenue sewer outlet has been the source of much nuisance by the gross pollution to adjacent bathing beaches. Many complaints have been made with reference to the conditions. The State Board of Health has made investigations and repeatedly recommended abatement of this pollution.

The existing plants at North Chicago, Highwood and Lake Forest are over-loaded and require additional units to provide sufficient capacity to treat the sewage from the tributary area.

Our State Department of Health has received many complaints with reference to the pollution along the North Shore—has repeatedly pointed out the need of sewage treatment—has recommended the construction of sewage treatment improvements.

The Result

Pollution along 25 miles of Lake shore from Winthrop Harbor to Highland Park.

Every bathing beach subject to bad sewage pollution.

Unnecessary and undesirable burden of harmful bacteria of intestinal origin placed on water purification plants.

Your children at the Bathing Beaches subjected to eye, ear nose and throat infection—or worse. It might be TYPHOID FEVER.
