

WHY

VAPOR-VAC AUTOMATIC VAPORIZER

SHOULD BE INSTALLED IN YOUR HOME

Heats Your Radiators Less Than One-third the Time
 Corrects Heating Defects

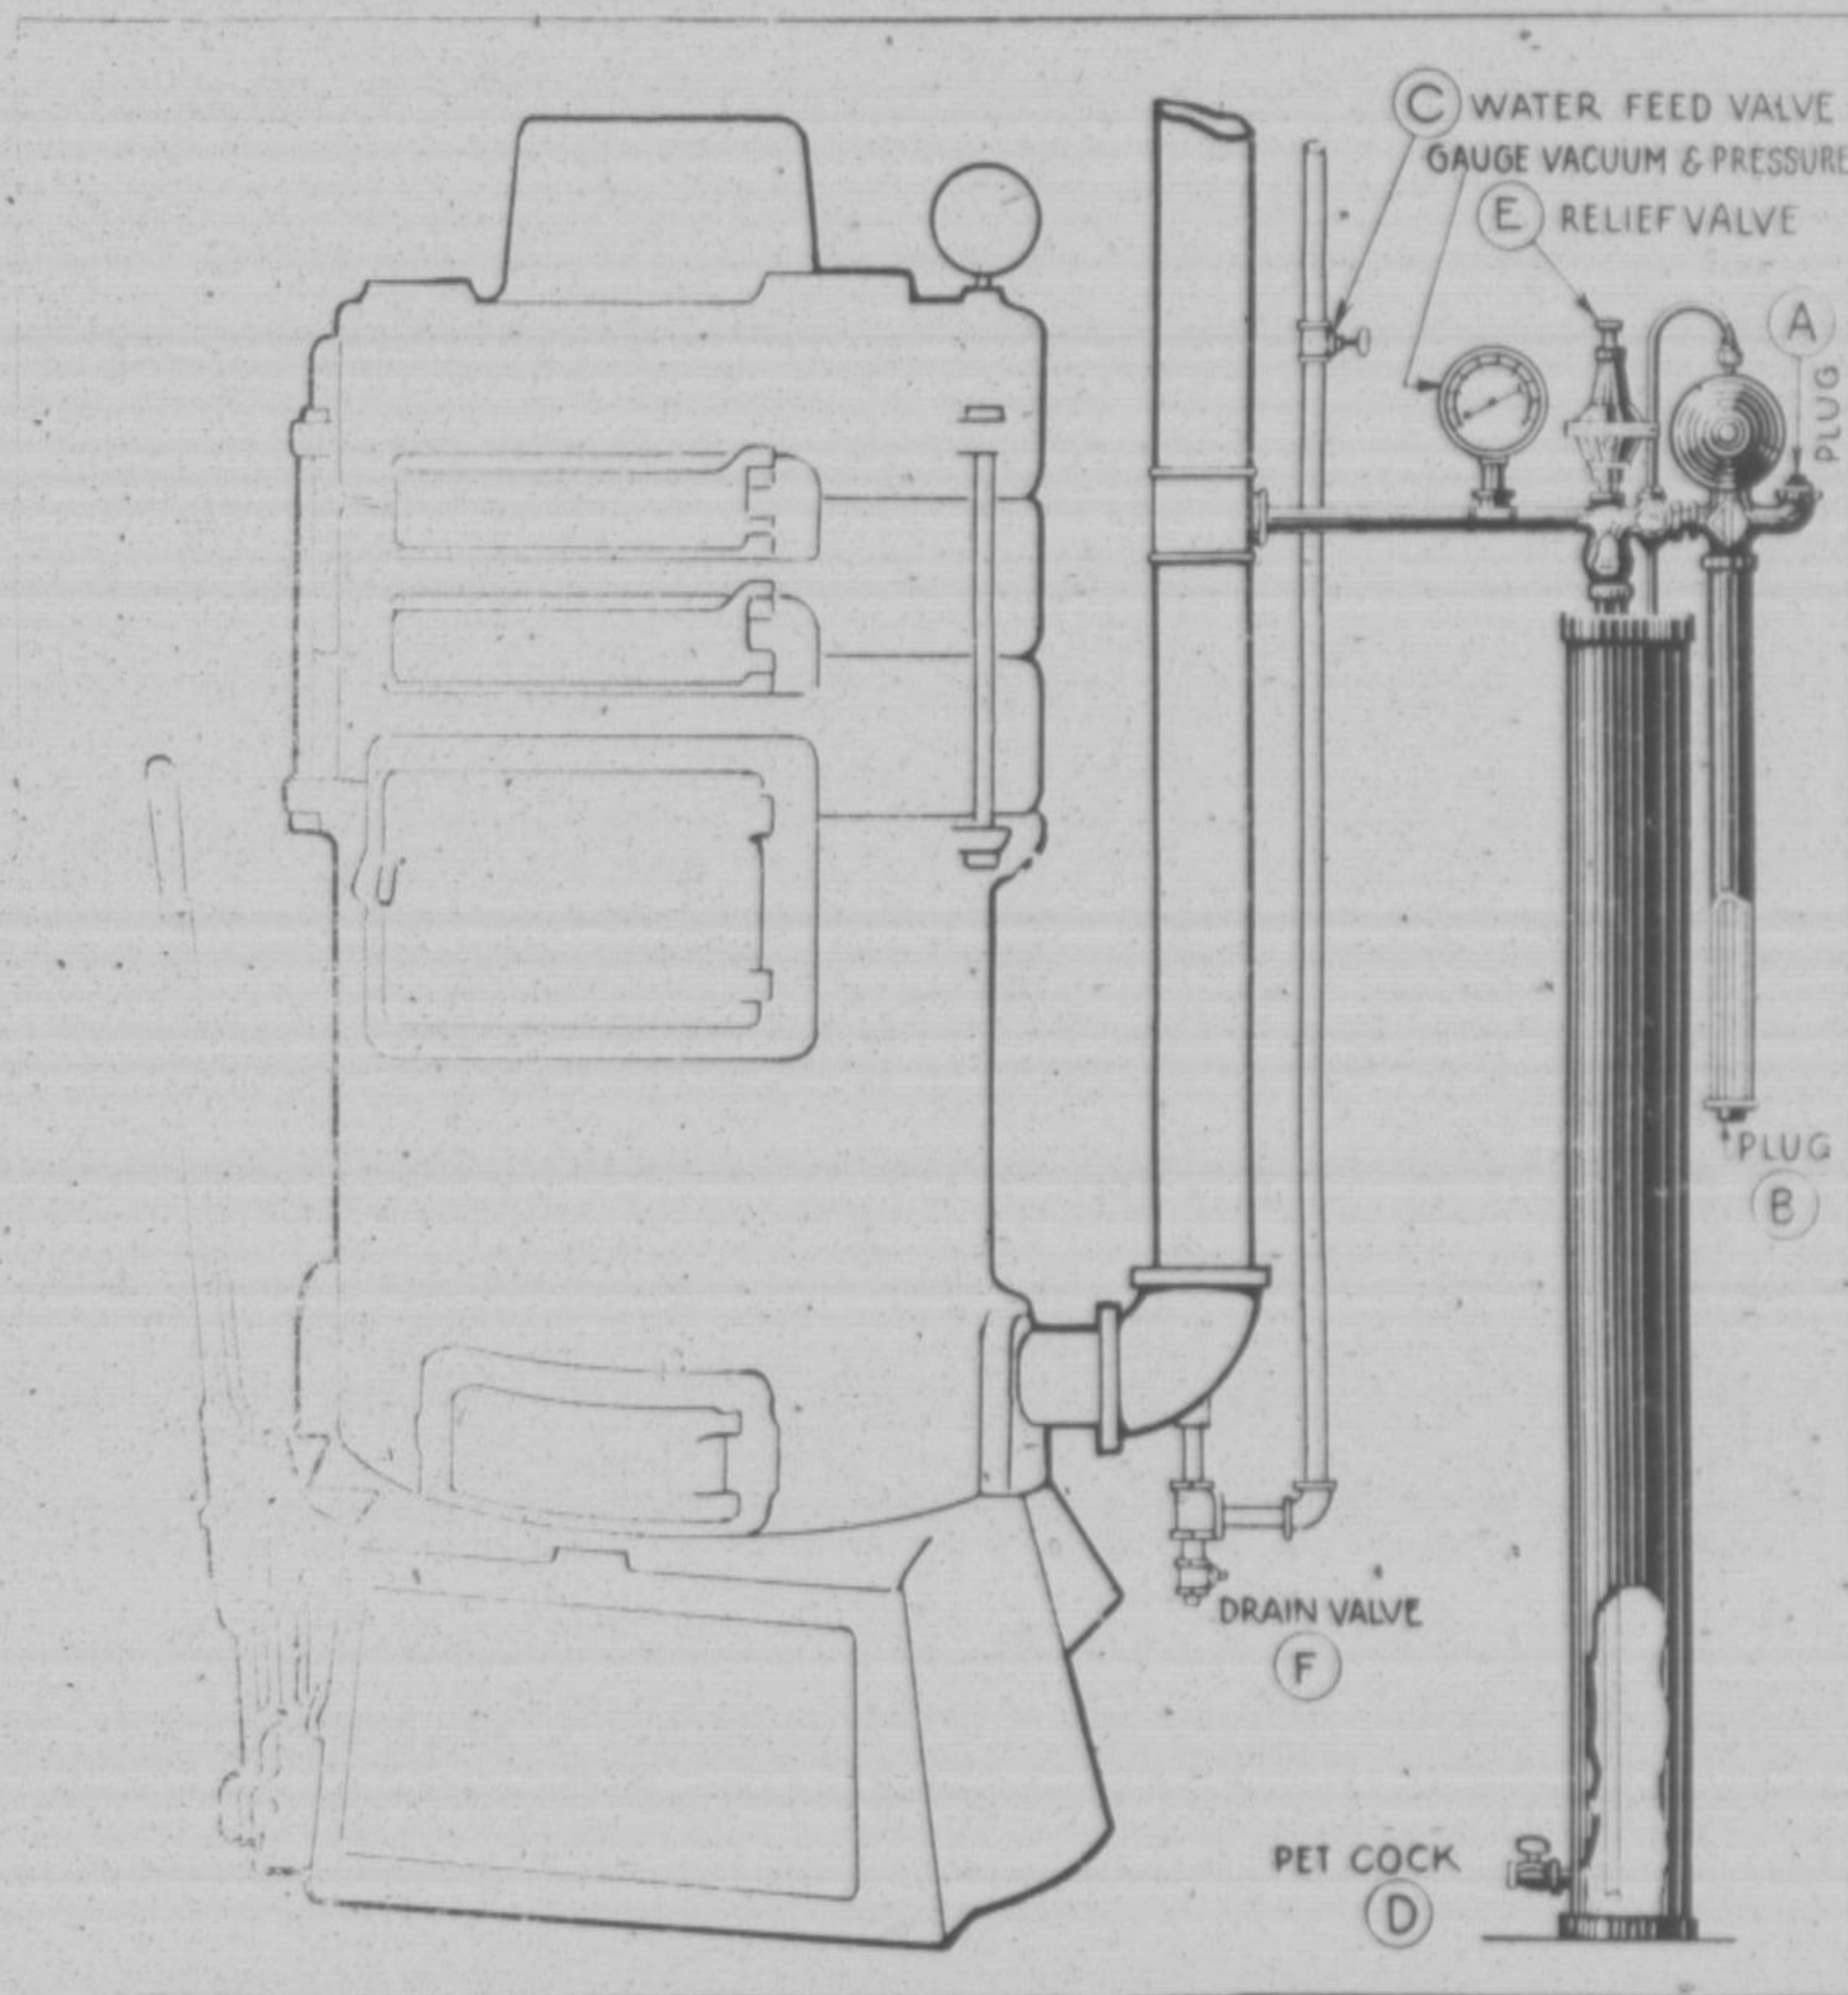

ADOPTED FOR OIL
 AND GAS BURNING
 BOILERS

SAVES FUEL

By absorbing more heat, this advantage is obtained by having your system under vacuum, emulsifying the water with vaporization at a low temperature, it has proven fuel saving as much as 30%.

Eliminates the constant overflow of water.

Vapor-Vac is quickly and easily installed to any old or new hot water heating plant. It requires only a small space.
