

## LAKE COUNTY SHARE OF GASOLINE TAXES

**\$184,661 Is Reported Available from State for Highway Improvement**

Lake county can now draw upon the state treasury for the \$184,661 recently announced as its share to improve and construct new highways, it was revealed at Springfield.

That amount is available through the 1930 gas tax collections. Garrett D. Kinney, director of the state finances, announced that \$9,194,193.05 is now ready for distribution to the 102 counties in the state.

The allotment to Lake county is based on the motor license fees paid by the county residents. The total amount of the gas tax collected in the state for 1930 was \$27,582,679.16. Of that amount two-thirds went to the state and was expended for roads built or is obligated for contracts let for roadwork.

Lake county will be able to use the fund on road improvements approved by the state highway department. A number of highway plans drawn by R. M. Lobdell, county superintendent of highways, for the coming year will be paid for by some of the gas tax fund.

## Urge Golden Rule for New Jersey Motorists

Motorists in New Jersey are being officially urged to adopt the Golden Rule as their driving code. Russell S. Wise, chairman of the New Jersey Traffic Commission, puts it in modern phrasing as follows:

"The sooner drivers show consideration for the rights of each other, the sooner will our accident casualties decrease."

An enthusiastic endorsement of Mr. Wise's proposal to adopt the ancient moral precept to present-day motoring comes from William L. Chenery, editor of Collier's Weekly, who comments:

"Everybody who uses crowded roads and streets knows the truth of that. Your safety and comfort depend not only on your own skill and care but also upon the behavior of others. A perfect driver is at the mercy of the fools and criminals and the merely reckless and inconsiderate who also use the road.

"Engineering construction, lights, policing and other devices make for safety but consideration for the rights of others is still the first rule of safety. If no one had ever previously thought of the Golden Rule, the modern automobile would have compelled its utterance. For the machine can't yield its maximum service unless the driver regards the rights of other motorists."

## Three Armed Bandits Rob Bank at Bristol Near Kenosha, Report

Three bandits, armed with machine guns, last week invaded the Holmes State bank at Bristol, ten miles southwest of Kenosha, looting the bank of between \$5,000 and \$6,000 in cash, and kidnapping the cashier, Clifford Ja-

cobs. The bandits escaped into Lake county in a sedan.

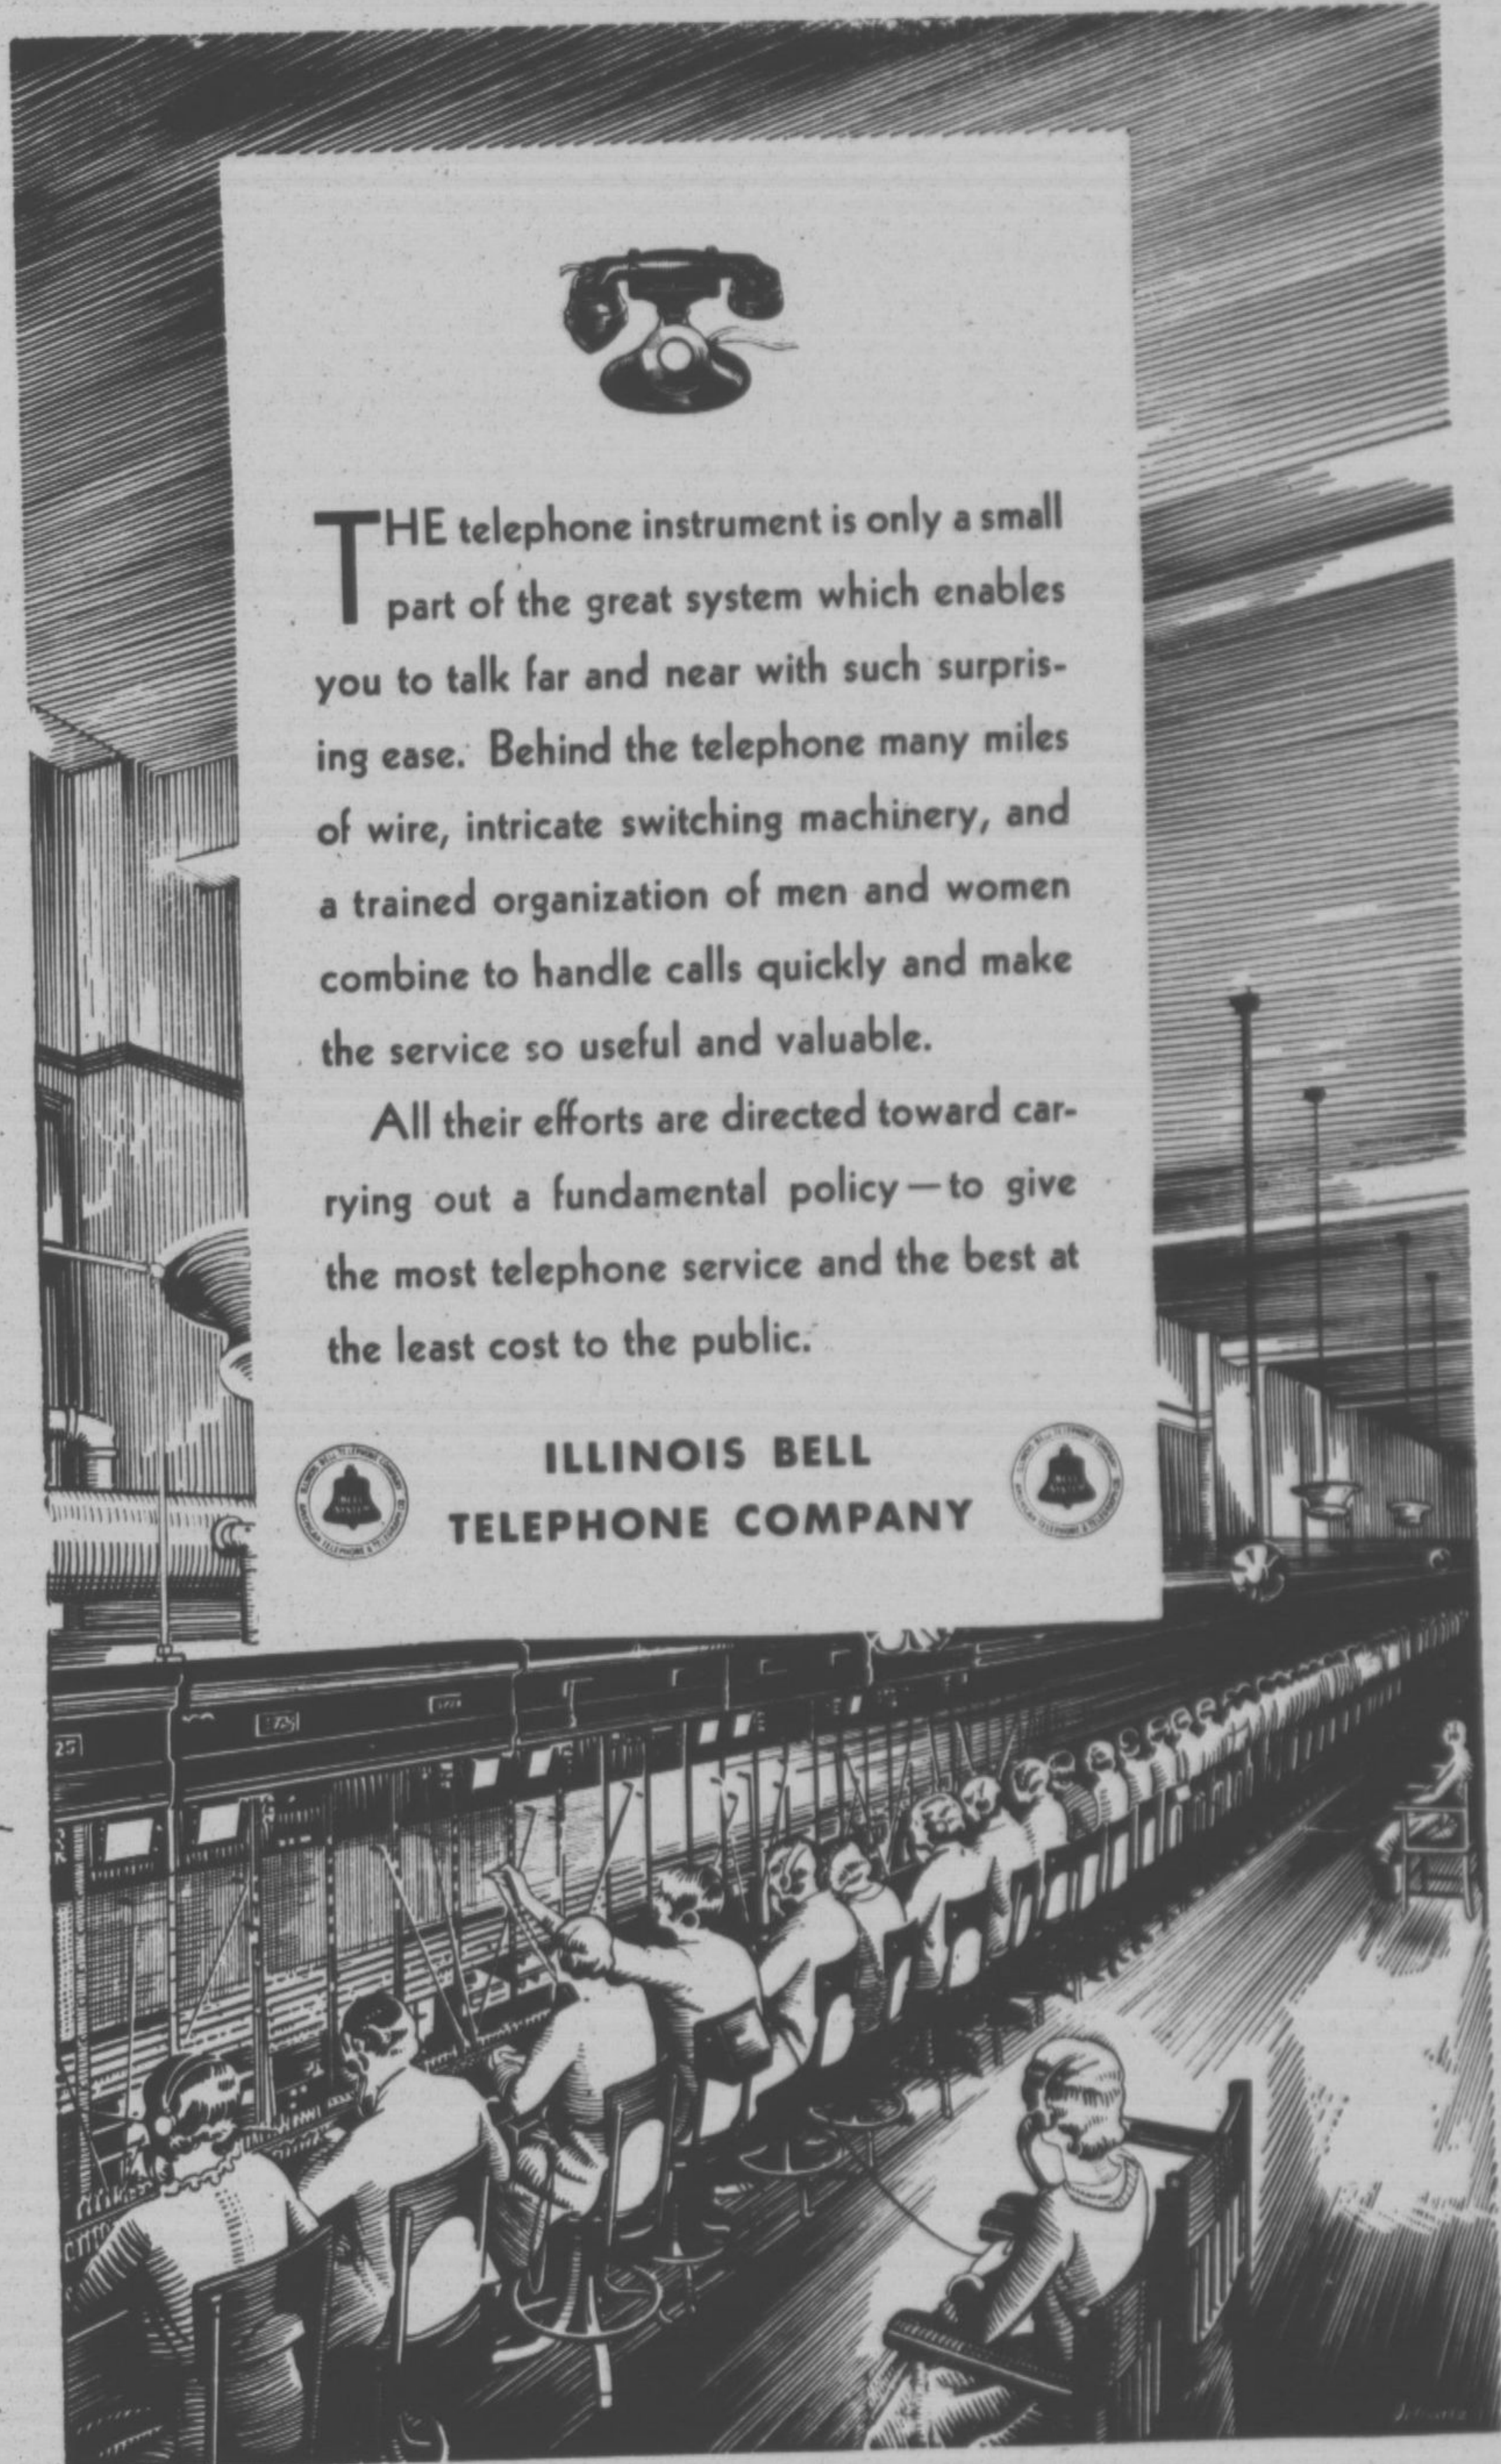

Sheriff's posses scoured the entire north shore for the bandits.

The three bandits walked into the bank at one o'clock. Menacing two customers, the president, Lawrence Jacobs, and the cashier, they scooped up the cash, in large bills, and backed through the door, pausing only a moment to force Jacobs to accompany them.

Bristol is a small village located seven miles from Antioch, and five miles from the Lake county line.

Lake county deputy sheriffs learned a few minutes after the robbery that the bandits were believed to be heading towards Antioch. All highways are being searched.

New name for a "chummy roadster": A Companionate Carriage.—Springfield (Ohio) Sun.

**THE** telephone instrument is only a small part of the great system which enables you to talk far and near with such surprising ease. Behind the telephone many miles of wire, intricate switching machinery, and a trained organization of men and women combine to handle calls quickly and make the service so useful and valuable.

All their efforts are directed toward carrying out a fundamental policy—to give the most telephone service and the best at the least cost to the public.
