

Runs Into Money

Swearing in Pennsylvania is punishable by a fine of 65 cents a word, so, you see, it costs the unhappy Pennsylvanian about \$9 to mash his thumb.—Macon (Ga.) Telegraph.

Several Park Board Elections Last Week in North Shore Towns

In four park board elections along the North Shore more than usual interest was shown by the voters last week, especially in Waukegan where the names of two candidates were written on the ballot.

Waukegan returned T. J. Stahl and L. J. Yeoman, incumbents, to the board, with John Gelling and Theodore Goldsmith, getting the support of the Industrial Athletic association. Stahl received 2,160, Yeoman 2,741, Gelling 1,176 and Goldsmith 1,051. Goldsmith's vote was hurt to a certain extent because some of the voters wrote in the name of Nicholas Goldschmidt.

Edward Vlack was the loser in the North Chicago fight with Charles Gartley and Alexander Karczewski defeating him for the full term and Frank Freeman, unopposed, winning for the vacancy created by the resignation of Frank Tiffany. Gartley got 899 votes, Karczewski 720 and Vlack 615. Freeman received 669.

John Udell and Milton Hardacre were unopposed in Highland Park.

In Lake Bluff, Edward Kynock and Richard E. Crawford lost to Mrs. Stewart Reed Brown and Kenneth G. Ives. Mrs. Brown was high with 418, Ives was second with 373, Kynock third with 117 and Crawford last with a vote of 106.

Man Charged Here With Confidence Game Also Wanted in Missouri

When Donald Reinhold, 35, worms his way out of the confidence game charge in which he is accused of swindling a Highland Park man out of \$16,000, he still will have accounts to settle with the St. Louis police, it was learned, says a Waukegan newspaper, when it was discovered that he became a fugitive from the Missouri city January 28, where he was charged with vagrancy.

Reinhold has been held in the county jail for more than a month, after being sought in Louisville, Ky., where it took Sheriff Lester T. Tiffany close to a week to get the necessary extradition papers to bring the man back.

Although he fought extradition vigorously, the man was brought back to face the charge.

In the complaint that was lodged, it was charged that worthless stock causing a transfer of \$16,000 was represented by Reinhold to be a valuable investment.

Reinhold protested his innocence to the charges of operating a confidence game, but during the time he has been in the county jail he has been unable to raise a bond for his release.

The sale of the stock, according to the complaint issued at the time, was more than two years ago and the \$16,000 speculation turned out to be absolutely worthless.

SKY HARBOR FLYER KILLED IN CRASH

Details of Death of Nels Roberts Whose Death Occurred Here April 8th

A student flyer was killed at the Sky Harbor airport at Glencoe April 8, when his plane was caught in cross currents of air as he took off from the field. The plane stalled in mid-air, slipped into a slow spin, and fell 150 feet to the ground.

The dead pilot was Nels Roberts, 33 years old, 6418 North Oakley avenue, Chicago, a mechanic at the airport who recently acquired his student pilot's license and hoped soon to take the tests for a commercial license. He had retained sufficient presence of mind as the plane made the sudden dip to shut off the ignition, preventing a fire, but could not regain control of the machine at so low an altitude.

Blame Spring Winds

At the inquest Thursday morning at Kelley's funeral home in Highland Park, observers declared that the accident had been caused by no fault in the plane, which was a "Trainer" bi-plane rented from the Great Lakes Aircraft company for practice flying. They blamed a phenomenon peculiar to Chicago weather in the early spring and known to most pilots of this vicinity—the conflict in air currents resulting from the cold air rising from the lake and the warm currents from the sun-warmed ground.

Roberts had taken off from the field with the nose of his plane facing a strong surface wind from the west. As he gained about 150 feet of altitude he suddenly passed into an equally strong east wind from the lake, a current for which the controls of the plane were totally unprepared. The plane stalled, and the novice was unable in the few seconds occupied by the ensuing dive to straighten his plane out. The plane landed on its wheels, but Roberts' head was dashed against the instrument board, causing skull fracture. He died a few minutes after being taken to the Highland Park hospital.

Eight Youths Arrested at Deerfield Accused of Briergate Robbery

Eight young men, members of well known North Shore families, were arrested last week by Deerfield police, following their confession to Chief Percy McLaughlin that they had broken into the club house of the Briergate Golf club there in a search for whiskey which they expected to find in the lockers of members.

Chief McLaughlin announced the confessions after he had quietly worked out the case against the youths and placed them under arrest. All were charged with disorderly conduct, pending the decision of club officials on the nature of charges they wish to prosecute. It is considered doubtful that any grave charge will be pressed. The youths were all released on the recognizance of their parents.

Nature Uses Limestone—

The early civilizations of all races were built on limestone soil. This interesting fact is not an accident, but is definitely related to fertility and the production of crops.

A limestone country is a rich country because nature has provided it with its

own material for keeping the soil balanced and in good condition.

Lime is a highly important ingredient in soils which are required to produce continued crops, and its exhaustion causes a marked decrease in productivity. It is necessary, therefore, that

THE SUPPLY SHOULD BE REPLACED

The home owner, in particular, is confronted by this problem. His lawn, his shrubbery, his flowers grow year after year in exactly the same location and in the same soil. He must, therefore, by the best method possible, restore the sub-

stances which are yearly removed.

The use of carefully selected ground limestone is the answer. It replaces the lime without producing harmful effects on the organic matter or bacterial life in the soil. It is nature's own choice.

NEUTRO-LIME, as the name implies, counteracts soil acids and brings the soil to a neutral condition but goes no further. It replaces the lime without producing harmful effects on the organic matter or on bacterial life in the soil. It does not make the soil alkaline.

NEUTRO-LIME
The Safe Soil Neutralizer and Conditioner

NEUTRO-LIME is primarily calcium carbonate (CaCO₃), a combination approximately 56% lime and 44% carbon dioxide. The carbon dioxide is displaced only as the soil acid combines with and is neutralized by the lime. This action continues only until the acid has been removed.
